Chapter 01: Business Now: Change Is the Only Constant

ANSWER: d

103. In the context of customer satisfaction, a product has value when _____.

- a. it is purchased through deals offered at retail stores
- b. its impact on the environment is negligible and its carbon footprint is zero
- c. it is bought at the lowest available price
- d. its benefits to the customer are equal to or greater than the price that the customer pays

ANSWER: d

104. In the context of the competitive environment of business, what is the rate at which a new product moves from conception to commercialization?

- a. power-to-cost
- b. speed-to-market
- c. on-site prototyping
- d. market base flow

ANSWER: b

105. In the context of the competitive environment of business, which of the following can be a key source of competitive advantage?

- a. A cost-to-serve analysis
- b. Speed-to-market
- c. Greenwashing
- d. Reserved banking

ANSWER: b

106. Ten Decimal Inc. is a leading laptop manufacturer which recently launched the Dec-1 model. Even before the sales of the Dec-1 model could reach their peak, the company launched the next version, Dec-2. Dec-2 overtook the sales of the Dec-1 model and also sales of its competitors' products. This helped Ten Decimal Inc. to maintain its position as a leading-edge laptop manufacturer. This scenario demonstrates the importance of _____ as a key source of competitive advantage.

- a. speed-to-market
- b. power-to-cost
- c. event chain methodology
- d. elemental cost planning

ANSWER: a

107. When Nakos, a technology solutions company, started producing smartphones in the mid-1900s, it faced severe losses because of the lack of a market for its product. Given this information, it can be concluded that Nakos _____.

- a. was a bleeding-edge firm
- b. used the concept of fast-laning
- c. had a low speed-to-market
- d. was a leading-edge firm

ANSWER: a

108. Balaniki, a media company, entered the streaming service industry only after conducting a thorough survey of the

Chapter 01: Business Now: Change Is the Only Constant

potential customer base. Balaniki waited for eight years before introducing its unique service—the first interactive short series—in the market. It introduced this product after ensuring that it would be embraced by the customers. In this scenario, Balaniki _____.

- a. has a high speed-to-market
- b. is a leading-edge firm
- c. uses the concept of fast-laning
- d. is a bleeding-edge firm

ANSWER: b

109. Jae-Seong is the regional manager of Tasty Treats, a packaged food company. He is respected by his peers and subordinates for his immense knowledge and skills. Jae-Seong decides to quit the company for a higher position at another firm. The CEO of Tasty Treats entices him with a competitive compensation package and promotion because he knows that Jae-Seong is an important resource. The given scenario most likely exemplifies the concept of _____.

- a. free trade
- b. blurred retirement
- c. workforce advantage
- d. social responsibility

ANSWER: c

110. In the context of the workforce advantage in the business environment, as the baby boom generation begins to retire, which of the following will likely become a crucial competitive issue in the next decade?

- a. Profitable implementation of speed-to-market strategies
- b. Successful use of digital resources to find customer data
- c. Finding and holding the best talent
- d. Increasing dysfunctional employee turnover

ANSWER: c

111. In the context of the workforce advantage in the business environment, finding and holding the best talent will likely become a crucial competitive issue in the next decade as the baby boom generation begins to retire. However, job market contraction may not be an issue, because _____.

- a. baby boomers include about 47 million people, while the generation that follows includes 77 million
- b. baby boomers contribute to dysfunctional turnover, which is likely to reduce after they retire
- c. reverse mentoring can ensure that young employees are properly trained by baby boomers
- d. many baby boomers opt to postpone retirement in the face of inadequate financial resources

ANSWER: d

112. Which of the following is a key dimension of the business environment?

- a. The communal environment
- b. The physiological environment
- c. The technological environment
- d. The political environment

ANSWER: c

113. In the context of the business environment, computers, telecommunications, and other digital tools are considered to be part of the _____.

Chapter 01: Business Now: Change Is the Only Constant

- a. economic environment
- b. social environment

- d. American Free Trade Agreement

ANSWER: c

148. In the context of the global environment of business, which of the following was the outcome of Hurricane Katrina in 2005?

- a. It had a catastrophic impact on several impoverished African economies that could least afford the hit.
- b. It decimated the travel industry and led to multibillion-dollar government outlays for Homeland Security.
- c. It brought the Gulf Coast oil industry to a virtual standstill.
- d. It dealt a devastating blow to tourism throughout Europe.

ANSWER: c

Essay

Chapter 01: Business Now: Change Is the Only Constant

149. In the context of the history of American business, explain how the entrepreneurship era is different from the industrial revolution.

ANSWER: Answers will vary. The Industrial Revolution witnessed technological advances that fueled a period of rapid industrialization in America from the mid-1700s to the mid-1800s. As mass production took hold, huge factories replaced skilled artisan workshops. The factories hired large numbers of semiskilled workers who specialized in a limited number of tasks. The result was unprecedented production efficiency but also a loss of individual ownership and personal pride in the production process. The entrepreneurship era was built on the foundation of the industrial revolution. Large-scale entrepreneurs emerged in the second half of the 1800s, building business empires. These industrial titans created enormous wealth, raising the overall standard of living across the country. But many also dominated their markets, forcing out competitors, manipulating prices, exploiting workers, and decimating the environment. Toward the end of the 1800s, the government stepped into the business realm, passing laws to regulate business and protect consumers and workers, creating more balance in the economy.

150. In the context of the history of American business, describe the emergence of the "hard sell" in the production era, and the marketing concept in the marketing era.

ANSWER: Answers will vary. During the production era, in the early part of the 1900s, major businesses focused on further refining the production process and creating greater efficiencies. Jobs became more specialized, increasing productivity and lowering costs and prices. In 1913, Henry Ford introduced the assembly line, which quickly became standard across major manufacturing industries. With managers focused on efficiency, the customer was an afterthought. But when customers tightened their belts during the Great Depression and World War II, businesses took notice. The "hard sell" emerged: aggressive persuasion designed to separate consumers from their cash. During the marketing era, after World War II, the balance of power shifted away from producers and toward consumers, flooding the market with enticing choices. To differentiate themselves from their competitors, businesses began to develop brands, or distinctive identities, to help consumers understand the differences among various products. The marketing concept emerged: a consumer focus that permeates successful companies in every department, at every level. This approach continues to influence business decisions today as global competition heats up to unprecedented levels.

151. How do nonprofit organizations play a critical role in an economy?

ANSWER: Answers will vary. Nonprofit organizations play a critical role in the economy, often working hand-in-hand with businesses to improve the quality of life in our society. Focusing on areas such as health, human services, education, art, religion, and culture, nonprofits are business-like establishments, but their primary goals do not include profits. Chuck Bean, Executive Director of the Nonprofit Roundtable, explains: "By definition, nonprofits are not in the business of financial gain. We're in the business of doing good. However, nonprofits are still businesses in every other sense—they employ people, they take in revenue, they produce goods and services and contribute in significant ways to our region's economic stability and growth." Nationwide, nonprofits employ about one in ten workers, accounting for more paid workers than the entire construction industry and more than the finance, insurance, and real-estate sectors combined. And nonprofit museums, schools, theaters, and orchestras have become economic magnets for many communities, drawing additional investment.

152. In the context of the factors of production, discuss how natural resources are different from capital.

ANSWER: Answers will vary. Natural resources include all inputs that offer value in their natural state, such as land, fresh water, wind, and mineral deposits. Most natural resources must be extracted, purified, or harnessed; people cannot actually create them. (Note that agricultural products, which people do create through planting and tending, are not a natural resource.) The value of all natural resources tends to rise with high demand, low supply, or both. Capital includes machines, tools, buildings, information, and technology—the synthetic resources that a business needs to produce goods or services. Computers and telecommunications capability have become pivotal elements of capital across a surprising range of industries, from financial services to professional sports. You may be surprised to learn that in this context, capital does not include money, but,

Chapter 01: Business Now: Change Is the Only Constant

clearly, businesses use money to acquire, maintain, and upgrade their capital.

153. In the context of the various dimensions of a business environment, briefly describe the technological environment.

ANSWER: Answers will vary. The broad definition of business technology includes any tools that businesses can use to become more efficient and effective. But more specifically, in today's world, business technology usually refers to computers, telecommunications, and other digital tools. Over the past few decades, the impact of digital technology on business has been utterly transformative. New industries have emerged, while others have disappeared. The creation of the internet has transformed not only business, but also people's lives. Anyone, anywhere, anytime can use the internet to send and receive images and data (as long as access is available). One result is the rise of e-commerce or online sales, which allow businesses to tap into a worldwide community of potential customers.
