CHAPTER 9: PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLES

<u>Related Assignment Materials</u>				
<i>Student Learning Objectives</i>	<i>Quick Studies</i>	<i>Exercises</i>	<i>Problems</i>	<i>Tableau Dashboard Activities</i>
1. Describe property, plant and equipment (PPE) and calculate their cost.	9-1, 9-2, 9-3, 9-4.	9-1, 9-2, 9-3, 9-4, 9-5, 9-9.	9-1A, 9-8A, 9-11A, 9-14A, 9-16A, 9-1B, 9-8B, 9-11B, 9-14B, 9-16B.	
2. Explain, record and calculate depreciation using the methods of straight-line, units-of-production and double-declining-balance.	9-5, 9-6, 9-7, 9-8, 9-9, 9-10, 9-11, 9-12, 9-13.	9-5, 9-6, 9-7, 9-8, 9-9, 9-10, 9-11, 9-12, 9-20, 9-21, 9-22, 9-24, 9-31, 9-32, 9-33, 9-34, 9-35, 9-36.	9-2A, 9-3A, 9-4A, 9-5A, 9-6A, 9-7A, 9-8A, 9-9A, 9-10A, 9-11A, 9-13A, 9-14A, 9-15A, 9-16A, 9-17A, 9-18A, 9-20A, 9-21A, 9-22A. 9-2B, 9-3B, 9-4B, 9-5B, 9-6B, 9-7B, 9-8B, 9-9B, 9-10B, 9-11B, 9-13B, 9-14B, 9-15B, 9-16B, 9-17B, 9-18B, 9-20B, 9-21B, 9-22B.	DA 9-1, DA 9-2, DA 9-3
3. Explain and calculate depreciation for partial years.	9-11, 9-12, 9-13.	9-13, 9-14, 9-15, 9-24, 9-31, 9-32, 9-34, 9-35, 9-36.	9-4A, 9-5A, 9-6A, 9-8A, 9-9A, 9-10A, 9-13A, 9-14A, 9-15A, 9-16A, 9-17A, 9-18A, 9-20A, 9-21A, 9-22A. 9-4B, 9-5B, 9-6B, 9-8B, 9-9B, 9-10B, 9-13B, 9-14B, 9-15B, 9-16B, 9-17B, 9-18B, 9-20B, 9-21B, 9-22B.	
4. Explain and calculate revised depreciation.	9-14, 9-15, 9-16.	9-16, 9-17, 9-18, 9-19, 9-20, 9-21.	9-11A, 9-12A, 9-22A 9-11B, 9-12B, 9-13B, 9-17B, 9-21B, 9-22B.	
5. Explain and record impairment losses.	9-17	9-22	9-14A, 9-14B, 9-16B.	
6. Account for asset disposal through discarding, selling or exchanging an asset.	9-18, 9-19, 9-20, 9-21.	9-23, 9-24, 9-25, 9-26, 9-27, 9-35.	9-15A, 9-16A, 9-17A, 9-18A,, 9-20A, 9-21A, 9-15B, 9-17B, 9-18B, 9-20B.	
7. Account for intangible assets and their amortization.	9-22, 9-23, 9-24	9-28, 9-29, 9-30, 9-31, 9-32, 9-33, 9-34	9-19A, 9-20A, 9-21A 9-19B, 9-20B	
8. *Appendix 9A - Explain and calculate revised depreciation when there is a betterment that creates partial-period depreciation.	9-25	9-36	9-22A 9-21B, 9-22B.

	Types of Intangibles	4:24
	Amortization of Intangibles	0:41

Learning Objectives:

Property, Plant, and Equipment (PPE) (LO1)

- A. Non-current assets that are used in the operations of a business and have a useful life of more than one accounting period are divided into three groups:

1. Tangible assets known as property, plant, and equipment
2. Intangible assets
3. Goodwill

Assets used in the operations to help generate revenue and have a useful life of more than one accounting period are property, plant, and equipment.

- B. Cost of PPE is consistent with cost principle, property, plant and equipment are recorded at cost. Cost includes all normal and reasonable expenditures necessary to get the asset in place and ready for its intended use.
- C. Subsequent expenditures may be incurred after an asset is placed in service. *Capital expenditures* are costs of PPE that provide material benefits extending beyond the current period. They are debited to PPE accounts and appear on the balance sheet. *Revenue expenditures* are normal costs incurred to keep an asset in its normal running condition. They are expenses and would appear on the income statement.

- D. Subsidiary ledgers may be kept for maintaining control of large numbers of assets. Low-cost asset purchases are usually expensed under the materiality principle.
- E. Low-cost assets may be expensed (treated as revenue expenditures) under the *materiality principle*.
- F. Land purchased as a building site—cost includes purchase price, commissions, title insurance, legal fees, accrued property taxes, surveying, clearing, landscaping, and local government assessments (current or future) for streets, sewers, etc. Also includes cost of removal of any existing structures (less proceeds from sale of residual material)
- G. Land Improvements—Costs that increase the usefulness of the land.
 1. Examples: parking lot surfaces, driveways, fences, and lighting systems have limited useful lives.
 2. Costs are charged to a separate Land Improvement account.
 3. Costs are allocated to the periods they benefit through depreciation.

H. Buildings

1. If purchased Cost usually include its purchase price, brokerage fees, taxes, title fees, attorney costs, and all expenditures to make it ready for its intended use. (Any necessary repairs or renovations such as wiring, lighting, flooring, and wall coverings).
 2. If constructed for own use—Costs includes materials and labour plus a reasonable amount of indirect overhead cost (heat, lighting, power, and depreciation on machinery used to construct the asset). Cost also includes design fees, building permits, and insurance during construction.
- I. Leasehold improvements are alterations or improvements made to leased property. Leasehold improvements become part of the property and revert to the lessor at the end of the lease. These amounts are depreciated over the life of the lease or life of the improvements, whichever is less.
- J. Machinery and Equipment—costs include all normal and necessary expenditures to purchase them and prepare them for their intended use (purchase price, taxes, transportation charges, insurance while in transit, and the installing, assembling and testing of machinery and equipment).
- K. Lump-Sum Purchase—a group of property, plant and equipment purchased with a single transaction for a lump-sum price. Individual asset cost determined by allocating the cost of the purchase among the different types of assets acquired based on their relative values.

Depreciation (LO2)

The process of allocating to expense the cost of a capital asset to the accounting periods benefiting from its use. Recorded as a debit to Depreciation Expense and a credit to Accumulated Depreciation.

A. Factors in Computing Depreciation

1. Cost—described above.
2. Residual value— (residual value) an estimate of the asset's value at the end of its benefit period.
3. Useful life— (service life) length of time the asset is expected to be productively used in a company's operations. Factors affecting useful life include:
 - a. Inadequacy—a condition in which the capacity of property, plant and equipment becomes too small for the productive demands of the business.
 - b. Obsolescence—a condition in which, because of new inventions and improvements, a capital asset can no longer be used to produce goods or services with a competitive advantage.

B. Depreciation Methods (See Visual #9-1)

1. Straight-line Method—charges the same amount to expense for each period of the asset's useful life. Calculation:
 - Cost minus residual value (equals the cost to be depreciated) divided by the asset's useful life. (Usually in years)
2. Units-of-Production Method—charges a varying amount to expense for each period of an asset's useful life depending on its usage. Charges are based on the consumed capacity of the asset. Examples of capacity measurements: miles driven, product outputs, hours used.

Calculation:

- Cost minus residual value divided by the number of units to be produced equals the depreciation per unit.
 - Depreciation per unit X number of units consumed in period equals the period's depreciation.
3. Declining-Balance Method—an accelerated depreciation method. Charges larger depreciation during the early years of an asset's life and smaller expenses in the later years.

Double-declining balance method (DDB) is also referred to as being twice the straight-line rate.

Calculation:

Calculate the rate. $2/\text{useful life} = \% \text{ (or } 100\%/\text{useful life} \times 2)$

Calculate annual depreciation as:

Net Book Value $\times$ Rate

Note: Depreciation is a method of allocation, not of valuation. The cost of a capital asset, less estimated residual, is allocated over the estimated useful life in a systematic and rational manner. The amount of depreciation charged per year may vary with the different methods. However, the total depreciation over an asset's life will be the same regardless of which method is used.

Depreciation for Tax Reporting—differences between financial and tax accounting systems are normal and expected.

1. Many companies use accelerated depreciation in computing taxable income because it postpones its tax payments by charging higher depreciation expense in the early years and lower amounts in the later years.
2. Federal income tax regulations require a company to depreciate assets according to the Capital Cost Allowance system (CCA)
3. The income tax regulations specify maximum CCA rates that businesses may claim but a business may decide to claim less than the maximum or claim none.

Partial-Year Depreciation (LO3)

When an asset is purchased (or disposed of) at a time other than the beginning or end of an accounting period, depreciation is recorded for the part of the year the asset was in use. The two methods we will examine are:

1. Nearest whole month, depreciation is calculated if the asset was in use for more than half of the month of acquisition.
2. Half-Year Convention, six months depreciation is recorded for the partial year, regardless of when the asset was acquired.

Revising Depreciation Rates (LO4)

A. Revising Depreciation Rates When There Is a Change in the Estimated Residual Value and/or Estimated Useful Life

Depreciation expense calculations are revised by spreading the remaining cost to be depreciated over the revised useful life remaining.

Calculation:

$$\frac{\text{Remaining Book value} - \text{Revised residual value}}{\text{Revised remaining useful life}}$$

The revision is referred to as a change in an accounting estimate and is reflected in future financial statements. Past statements are not changed.

B. Revising Depreciation Rates When There Is a Betterment

Subsequent capital expenditures will change the book value of the asset. A revision to depreciation is required to reflect the change. The first step is to bring depreciation up to date at the time of the subsequent capital expenditure. (Using the original rate) The capital expenditure may involve replacing a portion of an asset or adding to the asset without removing any portion. A journal entry is done to record the addition or the addition and removal of an old part. If an old part is removed there may be a loss recorded. Depreciation is then calculated at the revised rate.

Impairment of PPE Assets (LO5)

An impairment loss happens when a PPE item's book value is greater than the amount to be recovered through the asset's use or sale. Assets should be assessed for impairment annually. Technological, economic, or legal factors can all cause impairments to occur. The journal entry to record impairment:

Date	Impairment loss	XX
	Asset account	XX

The asset's book value will be reduced. Depreciation would be revised to reflect this change.

Disposals of PPE (LO6)

Assets may be discarded, sold, or exchanged due to wear and tear, obsolescence, inadequacy, or damage by fire or other accident.

- A. In general, accounting for disposals requires the following steps:
 1. Calculate depreciation expense up to the date of disposal.
 2. Record journal entry to record depreciation expense up to the date of disposal updating the accumulated depreciation account.
 3. Compare the asset's book value with the net amount received or paid at disposal and record any resulting gain or loss. *
 4. Remove the balances of the disposed asset and related accumulated depreciation accounts.
*Why? If the asset is gone, all accounts related to the asset (the asset account and its related accumulated depreciation) must be taken off the book as well. **
 5. Record and cash (and other assets) received or paid in the disposal.

*Step 3, 4, and 5 are recorded in one journal entry.

- B. Discarding PPE—follow general accounting procedure above.
 1. If fully depreciated—no loss (can never have a gain if discarding)
 2. If not fully depreciated—Record a loss (debit) equal to the book value.
- C. Selling PPE—follow general accounting procedure above. Compare value received to book value to determine gain (receive value greater than book value) or loss (receive value less than book value).
 1. Sale is at a gain if value received exceeds book value.
 2. Sale is at a loss if value received is less than book value.

Students frequently have difficulty in deriving the journal entry involving a gain or loss. It is very helpful to have them journalize the parts of the entry that they already know such as cash received, debit to accumulated depreciation and credit to the asset account. I usually leave a space between the debits and credits and show the calculation as being the difference between the two sides. A debit or credit can then be recorded with the entry still in the correct order. They just have to fill in the space!

D. Exchanging PPE

Assets are often exchanged (traded-in) for new assets. The exchange is treated as a sale of the old asset and the purchase of a new asset. The cost and accumulated depreciation of the old asset is removed from the books. The cost of the new asset will be recorded at the fair value of the asset(s) received. If the fair value cannot be reliably determined, the new asset will be recorded at the carrying value of the assets given up. Any gains or losses realized on the exchange are recorded at the time of disposal.

Intangible Assets (LO7)

Intangible assets have no physical substance but provide future economic benefits. Examples include patents, copyrights, leaseholds, drilling rights and trademarks. Accounting for intangibles is like accounting for PPE. Intangibles are recorded at cost when purchased. Cost is allocated to the asset over its useful life through amortization. The asset account itself is reduced. There is no accumulated account used. In this way intangibles will always be shown at net book value. Intangible assets are shown on the balance sheet separately from goodwill and property, plant, and equipment.

1. Depreciation is the systematic allocation of the cost of plant and equipment over its useful life.
2. Amortization is the systematic allocation of the cost of an intangible asset over its useful life.

Goodwill

Goodwill arises because of a business acquisition and reflects the amount paid for a business that exceeds the fair market value of the company's net assets (assets minus liabilities) if purchased separately. It is accounted for separately from other identifiable intangible assets on the financial statements.

At this point of student learning it is good to mention the concept of Goodwill and that it will be further discussed and learned in future accounting courses.

Appendix 9A Revised Depreciation When There Is a Betterment That Creates Partial-Period Depreciation (LO8)

In this case depreciation is calculated and recorded using the following steps:

1. Update depreciation on the equipment to the date of the betterment.
2. Record the betterment and remove the component being replaced.
3. Calculate and record revised depreciation on the equipment from date of betterment to end of Year.

VISUAL #9-1

FORMULAE FOR DEPRECIATION METHODS

1. STRAIGHT LINE

$$\frac{\text{Cost}-\text{Estimated Residual Value}}{\text{Estimated Useful Life (in years)}} = \text{Annual Depreciation}$$

2. UNITS OF PRODUCTION

$$\text{a) } \frac{\text{Cost}-\text{Estimated Residual Value}}{\text{Predicted units of production}} = \frac{\text{Depreciation}}{\text{per Unit}}$$

$$\text{b) Depreciation per unit} \times \text{units produced} = \text{Depreciation for PERIOD}$$

Depreciation should stop when book value is equal to residual value.

3. DOUBLE DECLINING BALANCE

Step 1: Calculate rate to be used---- $2/\text{Estimated useful life}$

Step 2. Multiply Net Book Value by Rate

$$\text{Net Book Value} = \text{Cost} - \text{Accumulated Depreciation to Date}$$

Depreciation should stop when book value is equal to residual value.

Alternate Demo Problem Chapter 9

A new machine cost \$100,000, has an estimated useful life of five years and an estimated residual value of \$15,000 at the end of that time. It is expected that the machine can produce 170,000 widgets during its useful life.

The New Times Company purchases this machine on January 1, 2022 and uses it for exactly three years. During these years the annual production of widgets has been 80,000, 50,000, and 30,000 units, respectively. On January 1, 2019, the machine is sold for \$45,000.

Required:

1. Calculate the depreciation expense for each of the first three years using
 - a. straight-line
 - b. units-of-production
 - c. double-declining-balance
2. Prepare the proper journal entry for the sale of the machine under the three different depreciation methods.

Solution to Alternate Demo Problem Chapter 9**1a. Straight-line**

The depreciation expense each year is equal to (cost - residual) / useful life. In this example the cost is \$100,000, the residual is \$15,000, and the useful life is 5 years. Therefore,

$$\begin{aligned}\text{Annual depreciation} &= (100,000 - 15,000) / 5 \\ &= 17,000 \text{ each year}\end{aligned}$$

1b. Units-of-production

The depreciation expense each year is equal to a rate

[(cost-residual) / total production] multiplied by the actual number of units produced that year. In this example the rate would be \$0.50 per widget, $(100,000 - 15,000) / 170,000$, and the depreciation expense for each of the first three years would be:

2022	=	.50	x	80,000	=	40,000
2023	=	.50	x	50,000	=	25,000
2024	=	.50	x	30,000	=	15,000

1c. Double-declining-balance

The depreciation expense each year is equal to a rate (twice the straight-line rate, or $2 / \text{useful life}$) multiplied by the asset's net book value (cost less accumulated depreciation) at the beginning of the year. In this example the rate would be $2/5$, or 40%, and the depreciation expense for each of the first three years would be

2022	=	.40	x	100,000	=	40,000
2023	=	.40	x	60,000	=	24,000
2024	=	.40	x	36,000	=	14,400

2. The journal entry for the sale of the asset will have the same general form regardless of the method of depreciation adopted, except that whether there is a gain or a loss on the sale may change according to the depreciation method used. The gain or loss on disposal of the asset is determined by comparing the sale price, in this case \$45,000, with the net book value of the asset at the time of the sale.

Straight-line

Cash	45,000	
Accumulated depreciation	51,000	
Loss on sale of machine	4,000	
Machine.....		100,000

Units-of-production

Cash	45,000	
Accumulated depreciation	80,000	
Machine.....		100,000
Gain on sale of machine		25,000

Double-declining-balance

Cash	45,000	
Accumulated depreciation	78,400	
Machine.....		100,000
Gain on sale of machine		23,400

Chapter 9 Property, Plant and Equipment and Intangibles

Chapter Opening Critical Thinking Challenge Questions*

You are asked by the CFO of YVR to evaluate the newest capital asset, the Airside Operations Building at YVR, and to break it into major components for depreciation purposes. Identify at least five major components and determine an expected life for each of those components.

Components of the Airside Operations Building could include:

1. Building exterior walls	40 years
2. Roofing	25 years
3. Pavement	15 years
4. Landscaping	10 years
5. Electrical Components	15 years
6. Flooring	15 years
7. Plumbing	15 years
8. Furniture and Fixtures	15 years
9. Fire Equipment	20 years
10. Snow Removal Equipment	20 years

*The Chapter 9 Critical Thinking Challenge questions are asked at the beginning of this chapter. Students are reminded at the conclusion of the chapter to refer to the Critical Thinking Challenge questions at the beginning of the chapter. The solutions to the Critical Thinking Challenge questions are available here in the Solutions Manual and accessible to students in the print and ebooks.

Concept Review Questions

1. A property, plant and equipment asset is long-lived in that it has a service life of longer than one accounting period; it is used in the production or sale of products or services. It is different from other assets such as receivables or inventory in that the property, plant and equipment is used within the operations of business to generate profit, whereas inventory is purchased or manufactured for resale. Receivables represent the amounts due from customers based on past transactions.
2. Land held for future expansion is classified as a long-term investment. It is not a property, plant and equipment asset because it is not being used in the production or sale of other assets or services.
3. The cost of a property, plant and equipment asset includes all normal, reasonable, and necessary costs of getting the asset in place and ready to use. For example, cost includes such items as the invoice price paid, freight costs, non refundable sales taxes (PST, HST) and all costs incurred related to installing and testing an asset before it is put into use.
4. Land is an asset with an unlimited life and, therefore, is not subject to depreciation. Land improvements refer to items such as fencing, parking lots surfaces, landscape lighting and have limited lives and are depreciated over their useful lives.
5. No. The Accumulated Depreciation, Machinery account is a contra asset account with a credit balance that does not represent cash or any other funds. Funds available for buying machinery would be shown on the balance sheet as liquid assets with debit balances, such as the account Cash and Cash Equivalents. The balance of the Accumulated Depreciation, Machinery account shows the portion of the machinery's original cost that has been charged to depreciation expense, and gives some indication of how soon the asset will need to be replaced.
6. Repairs are made to keep a plant and equipment asset in normal, good operating condition, and should be charged to expense of the current period. Repairs and maintenance expenses decrease profit on the income statement in the current period. Betterments are made to extend the service potential or the life of a plant and equipment asset beyond the original estimated life and are charged to the plant and equipment asset account. After incurring a betterment, a depreciation policy also needs to be established.
7. Because the \$75 cost of the plant and equipment asset is not likely to be material to the users of the financial statements, the materiality principle justifies charging it to expense.
8. Spin Master had Depreciation and amortization of 103 and 84.6 (millions) in 2020 and 2019 as seen on the Consolidated statements of Cash flows.

9. A company might sell or exchange an asset when it reaches the end of its useful life, or if it becomes inadequate or obsolete, or because the company has changed its business plans. An asset may also be damaged or destroyed by fire or some other accident.
10. An intangible asset has no physical existence. Its value comes from the unique legal and contractual rights held by its owner.
11. Types of intangible assets are patents, copyrights, leaseholds, drilling rights, and trademarks.
12. Indigo reported \$24,571,000 as Intangible assets at March 28, 2020.
13. A business can only record goodwill when the price paid for a company being purchased exceeds the fair market value of this company's net assets (assets minus liabilities) if purchased separately.
14. Recipe reported Goodwill at December 31, 2020 of \$198,313,000.
15. When an asset is constructed, such as the development of a new runway, all costs for construction-related materials and labour costs can be capitalized. Also, any electricity and utilities consumed relating to the project, plus a reasonable amount for depreciation on any equipment used during construction. Other permitted costs include design fees, building materials and any interest charges on debt outstanding during the period of construction incurred to finance the project.

QUICK STUDY**Quick Study 9-1 (5 minutes)**

$$\$18,000 + \$180,000 + \$3,000 + \$600 = \underline{\underline{\$201,600}}$$

Quick Study 9-2 (10 minutes)

Invoice cost.....	\$11,000
Freight costs	280
Steel mounting	815
Assembly	4,055
Less: discount (\$11,000 × 2%).....	<u>(220)</u>
Total acquisition costs	<u>\$15,925</u>

Note: The \$50 gloves are an expense and therefore not capitalized.

Quick Study 9-4 (10 minutes)

PPE Item	(a) Appraised Values	(b) Ratio of Individual Appraised Value to Total Appraised Value (a) ÷ Total Appraised Value	(c) Cost Allocation (b) x Total Actual Cost
Land	\$ 320,000	320,000 ÷ 500,000 = .64 or 64%	\$ 345,600 ¹
Building	<u>180,000</u>	180,000 ÷ 500,000 = .36 or 36%	<u>194,400</u> ²
Totals	<u>\$ 500,000</u>		<u>\$ 540,000</u>

1. $64\% \times 540,000 = 345,600$

2. $36\% \times 540,000 = 194,400$

2023

Apr. 14	Land.....	345,600	
	Building	194,400	
	Cash		85,000
	Notes Payable.....		455,000
	<i>To record purchase of land and building.</i>		

Quick Study 9-5 (10 minutes)

TechCom
Partial Balance Sheet
October 31, 2023

Assets**Current assets:**

Cash.....		\$ 9,000	
Accounts receivable.....	\$16,400		
Less: Allowance for doubtful accounts	<u>800</u>	<u>15,600</u>	
Total current assets			\$ 24,600

Property, plant and equipment:

Land		\$48,000	
Vehicles.....	\$62,000		
Less: Accumulated depreciation	<u>13,800</u>	48,200	
Equipment	\$25,000		
Less: Accumulated depreciation	<u>3,800</u>	<u>21,200</u>	
Total property, plant and equipment			117,400

Intangible assets:

Patent.....	\$20,100		
Less: Accumulated amortization, patent	<u>3,100</u>	<u>17,000</u>	
Total assets			<u>\$159,000</u>

Quick Study 9-6 (10 minutes)

$$(\$55,900 - \$1,900)/4 = \underline{\$13,500/\text{year}}$$

Quick Study 9-7 (10 minutes)

1. Straight-line depreciation for the first year.

$$[(\$140,000 - \$20,000) / 6 \text{ years}] \times 3/12 = \underline{\$ 5,000}$$

2. Straight-line depreciation for the second year.

$$(\$140,000 - \$20,000) / 6 \text{ years} = \underline{\$20,000}$$

Quick Study 9-8 (10 minutes)

$$\text{Rate per copy} = (\$45,000 - \$5,000)/4,000,000 \text{ copies} = \underline{\$0.01/\text{copy}}$$

Year	Calculation	Annual Depreciation
2023	$\$.01 \times 650,000 =$	\$6,500
2024	$\$.01 \times 798,000 =$	7,980
2025	$\$.01 \times 424,000 =$	4,240
2026	$\$.01 \times 935,000 =$	9,350
2027	$\$.01 \times 1,193,000 =$	<u>11,930</u>
		<u>\$40,000</u>

Quick Study 9-9 (10 minutes)

$$\text{Annual rate of depreciation} = 2/5 = .40 \text{ or } 40\% \text{ per year}$$

Year	Calculation	Annual Depreciation
2023	$40\% \times \$86,000 =$	\$34,400
2024	$40\% \times (\$86,000 - \$34,400) =$	20,640
2025	$40\% \times (\$86,000 - \$34,400 - \$20,640) =$	12,384
2026	$40\% \times (\$86,000 - \$34,400 - \$20,640 - \$12,384) =$	2,576*
2027		<u>0</u>
		<u>\$70,000</u>

*The calculation shows \$7,430 of depreciation but that amount would cause accumulated depreciation to exceed the maximum allowed of cost less residual ($\$86,000 - \$16,000 = \$70,000$). Therefore, the depreciation for 2026 must be adjusted to \$2,576.

Quick Study 9-10 (10 minutes)

Computer panel:

\$4,000/8 years = \$500 depreciation

Dry-cleaning drum:

\$70,000 - \$5,000 = \$65,000/400,000 garments = \$0.1625/garment;

\$0.1625/garment × 62,000 garments = \$10,075 depreciation

Stainless steel housing:

\$85,000 - \$10,000 = \$75,000/20 years = \$3,750 depreciation

Miscellaneous parts:

\$26,000/2 years = \$13,000 depreciation

Total depreciation on the dry-cleaning equipment for 2023= \$500 + \$10,075 + \$3,750 + \$13,000
= \$27,325

Quick Study 9-11 (10 minutes)

	<u>2023</u>	<u>2024</u>
a.	\$5,000	\$6,000
b.	\$3,000	\$6,000

Calculations:

a. $\frac{60,000 - 0}{10 \text{ years}} = 6,000/\text{year} \times 10/12 = 5,000$

b. $6,000/\text{year} \times 6/12 = 3,000$

Quick Study 9-12 (10 minutes)

	<u>2023</u>	<u>2024</u>
a.	\$10,000	\$10,000
b.	\$6,000	\$10,800

Calculations:

a. $2/10 = .2$ or 20%; $20\% \times 60,000 = 12,000 \times 10/12 = 10,000$ for 2023
 $20\% \times (60,000 - 10,000) = 10,000$ for 2024

b. $20\% \times 60,000 = 12,000 \times 6/12 = 6,000$ for 2023
 $20\% \times (60,000 - 6,000) = 10,800$ for 2024

Quick Study 9-13 (10 minutes)

	<u>2023</u>	<u>2024</u>
a.	10,000	14,000
b.	10,000	14,000

Calculations:

$75,000 - 15,000 = 60,000 / 120,000 = \0.50 depreciation expense per unit produced

$\$0.50 \times 20,000 = \$10,000$ for 2023; $\$0.50 \times 28,000 = \$14,000$ for 2024

NOTE: The units-of-production method is a usage-based method as opposed to a time-based method (such as straight-line and double-declining-balance) and therefore partial periods do not affect the calculations.

Quick Study 9-14 (10 minutes)

$[(\$35,720 - \$11,820^1) - \$1,570] / 7^2$ years remaining = **\$3,190**

1. $(\$35,720 - \$4,200) / 8 = \$3,940 / \text{year} \times 3 \text{ years} = \$11,820$

2. $10 - 3 = 7$

Quick Study 9-15 (10 minutes)

2023

Jan. 3	Barbecue – Rotisserie.....	1,000	
	Cash.....		1,000
	<i>To record the purchase of electronic rotisserie.</i>		

Dec. 31	Depreciation Expense, Barbecue.....	1,560	
	Accumulated Depreciation, Barbecue.....		1,560
	<i>To record revised depreciation on the barbecue caused by the addition of a rotisserie; $\\$7,000 - \\$200 = \\$6,800 \div 5 \text{ years} = \\$1,360$ PLUS $\\$1,000 \div 5 \text{ years} = \\200; Total depreciation = $\\$1,360 + \\$200 = \\$1,560$.</i>		

Quick Study 9-16 (10 minutes)

\$65,800	Cost
<u>- 15,950</u>	Accumulated depreciation (first year)
49,850	Book value at point of revision
<u>- 2,000</u>	Salvage value
47,850	Remaining depreciable cost
<u>÷ 2</u>	Years of life remaining
<u>\$23,925</u>	Depreciation per year for years 2 and 3

Quick Study 9-17 (10 minutes)

Impairment losses occurred on the computer and the furniture in the amounts of \$1,500 and \$21,000, respectively.

Calculations:

Asset	Cost	Accumulated Depreciation	Book Value	Recoverable Amount	Impairment Loss
Building	\$1,200,000	\$465,000	\$735,000	\$735,000	N/A
Computer	3,500	1,800	1,700	200	\$ 1,500
Furniture	79,000	53,000	26,000	5,000	21,000
Land	630,000	0	630,000	790,000	N/A
Machine	284,000	117,000	167,000	172,000	N/A

Quick Study 9-18 (10 minutes)

a.

2023

2023

Oct. 1	Mineral Rights	35,000,000	
	Water Rights	4,000,000	
	Cash		9,000,000
	Long-Term Note Payable		30,000,000

To record the purchase of intangibles.

Dec. 31	Amortization Expense, Mineral Rights	875,000	
	Accumulated Amortization, Mineral Rights		875,000

*To record amortization of mineral rights;
 $\$35,000,000 \div 10 \text{ years} = \$3,500,000/\text{year};$
 $\$3,500,000/\text{year} \times 3/12 = \$875,000.$*

31	Amortization Expense, Water Rights	100,000	
	Accumulated Amortization, Water Rights		100,000

*To record amortization of water rights;
 $\$4,000,000 \div 10 \text{ years} = \$400,000/\text{year};$
 $\$400,000/\text{year} \times 3/12 = \$100,000.$*

Quick Study 9-24 (10 minutes)

Jan.1	Iron Ore Mine.....	1,400,000	
	Cash.....		1,400,000

Record purchase of iron ore mine

Jan.1	Iron Ore Mine.....	400,000	
	Cash.....		400,000

Record purchase of iron ore mine access costs

Dec. 31	Depreciation Expense—iron ore mine.....	288,000	
	Accumulated Depreciation— iron ore mine.....		288,000

Record depreciation [$\$(1,800,000 - \$200,000) / 1,000,000 \text{ tons} = \$1.60 \text{ per ton}; 180,000 \text{ tons} \times \$1.60 = \$288,000$].

***Quick Study 9-25 (20 minutes)**

Motor (old)	$\$45,000 - \$5,000 = \$40,000 \div 10 \text{ yrs} \times 8/12 =$	\$ 2,667
Motor (new)	$\$60,000 - \$10,000 = \$50,000 \div 8 \text{ yrs} \times 4/12 =$	2,083
Metal housing	$\$68,000 - \$15,000 = \$53,000 \div 25 \text{ yrs} =$	2,120
Misc. parts	$\$15,000 \div 5 \text{ yrs} =$	<u>3,000</u>
Total depreciation expense to be recorded on the machine for 2023 =		<u><u>\$ 9,870</u></u>

EXERCISES**Exercise 9-1 (10 minutes)**

Invoice cost.....	\$28,000
Freight costs	450
Steel mounting	985
Assembly	660
Raw materials for testing.....	310
Less: discount (\$28,000 × 1%).....	<u>(280)</u>
Total acquisition costs	<u>\$30,125</u>

Note: The \$380 repairs are an expense and therefore not capitalized.

Note: The special insurance is an expense and therefore not capitalized.

Exercise 9-2 (15 minutes)

Cost of land:

Purchase price for land	\$1,200,000
Purchase price for old building	480,000
Demolition costs for old building	75,000
Levelling the lot	<u>105,000</u>
Total cost of land	<u>\$1,860,000</u>

Cost of new building:

Construction costs.....	\$2,880,000
Less: Cost of land improvements*	<u>215,000</u>
Cost of new building.....	<u>\$2,665,000</u>

**The land improvements are a distinct PPE asset that depreciates at a different rate than the building. Therefore, it should be debited to an account separate from the building.*

Journal entry:

2023

Mar. 10	Land.....	1,860,000	
	Land Improvements	215,000	
	Building	2,665,000	
	Cash		4,740,000
	<i>To record costs of plant assets.</i>		

Exercise 9-3 (15 minutes)

Allocation of total cost:

	(a)	(b)	(c)
PPE Asset	Appraised Values	Ratio of Individual Appraised Value to Total Appraised Value (a) ÷ Total Appraised Value	Cost Allocation (b) x Total Actual Cost
Land	\$249,480	$249,480 \div 594,000 = .42$ or 42%	\$ 244,346 ²
Land Imprv.	83,160	$83,160 \div 594,000 = .14$ or 14%	81,448 ³
Building	<u>261,360</u>	$261,360 \div 594,000 = .44$ or 44%	<u>255,981</u> ⁴
Totals	<u>\$594,000</u>		<u>\$ 581,775</u> ¹

1. $552,375 + 29,400 = 581,775$

2. $42\% \times 581,775 = 244,346$

3. $14\% \times 581,775 = 81,448$

4. $44\% \times 581,775 = 255,981$

Journal entry:

2023

Apr. 12	Land.....	244,346	
	Land Improvements	81,448	
	Building.....	255,981	
	Cash		581,775
	<i>To record costs of lump-sum purchase.</i>		

Exercise 9-4 (20 minutes)

2023

Jan. 1	Land.....	1,296,000	
	Building	1,512,000	
	Equipment.....	1,123,200	
	Tools.....	388,800	
	Cash.....		1,104,000
	Notes Payable		3,216,000
	<i>To record lump-sum purchase.</i>		

Calculations:

PPE Asset	(a)	(b)	(c)
	Appraised Values	Ratio of Individual Appraised Value to Total Appraised Value (a) ÷ Total Appraised Value	Cost Allocation (b) x Total Actual Cost
Land	\$ 1,152,000	$1,152,000 \div 3,840,000 = .30$ or 30%	\$ 1,296,000 ¹
Building	1,344,000	$1,344,000 \div 3,840,000 = .35$ or 35%	1,512,000 ²
Equipment	998,400	$998,400 \div 3,840,000 = .26$ or 26%	1,123,200 ³
Tools	<u>345,600</u>	$345,600 \div 3,840,000 = .09$ or 9%	<u>388,800</u> ⁴
Totals	<u>\$ 3,840,000</u>		<u>\$ 4,320,000</u>

1. $30\% \times 4,320,000 = 1,296,000$
2. $35\% \times 4,320,000 = 1,512,000$
3. $26\% \times 4,320,000 = 1,123,200$
4. $9\% \times 4,320,000 = 388,800$

Exercise 9-5 (10 minutes)

2023

Jan. 1	Truck.....	87,000	
	Cash.....		87,000

Calculation:

$$52,500 + 21,000 + 7,500 + 6,000 = 87,000$$

Jan. 4	Prepaid Insurance.....	5,100	
	Gas Expense	225	
	Cash.....		5,325

2023

Dec 31	Depreciation Expense, Truck	15,600	
	Accumulated Depreciation, Truck		15,600
	<i>To record depreciation.</i>		

Calculation:

$$[(52,500 + 21,000 + 7,500 + 6,000) - 9,000] / 5 \text{ years} = 15,600$$

Note: Insurance expense entries could also be made, to move from prepaid insurance, although not required in question.

Exercise 9-6 (15 minutes)

Year	a. Straight-Line	b. Double-Declining-Balance	c. Units-of-Production
2021	\$32,550	\$75,100	\$26,880
2022	\$32,550	\$37,550	\$28,910
2023	\$32,550	\$17,550	\$36,890
2024	\$32,550		\$37,520
Total	\$130,200	\$130,200	\$130,200

Explanation:

a.

$$(\$150,200 - \$20,000)/4 = \$32,550/\text{year}$$

b.

Double-declining-balance (Rate = $2/4 = 0.50$ or 50%):

$$50\% \times \$150,200 = \$75,100$$

$$50\% \times (\$150,200 - \$75,100) = \$37,550$$

Maximum depreciation is limited to \$130,200 which is cost less residual (\$150,200 – \$20,000) therefore depreciation for 2023 is \$17,550 calculated as \$130,200 – \$112,650 accumulated depreciation recorded to date.

c.

Units-of-production: (Rate = $[(\$150,200 - \$20,000)/186,000] = \$0.70/\text{unit}$)

$$\$26,880 (\$0.70 \times 38,400)$$

$$\$28,910 (\$0.70 \times 41,300)$$

$$\$36,890 (\$0.70 \times 52,700)$$

Maximum depreciation is limited to \$130,200 which is cost less residual (\$150,200 – \$20,000) therefore depreciation for 2024 is \$37,520 calculated as \$130,200 – \$92,680 accumulated depreciation recorded to date.

Exercise 9-7 (15 minutes)

- a. $(\$305,200 - \$52,400)/5 = \$50,560$
- b. Rate = $2/5 = .40$ or 40% $40\% \times \$305,200 = \$122,080$
- c.
 Rate = $(\$305,200 - \$52,400)/320,000 \text{ km} = \$0.79/\text{km}$
 $\$0.79/\text{km} \times 30,000 \text{ km} = \$23,700$

Analysis component:

The units-of-production method will produce the highest profit in 2023 because it is the lowest depreciation expense for 2023.

Exercise 9-8 (30 minutes)

Year	<u>Straight-Line¹</u>		<u>Double-Declining-Balance²</u>		<u>Units-of-Production³</u>	
	Depreciation Expense	Book Value at December 31	Depreciation Expense	Book Value at December 31	Depreciation Expense	Book Value at December 31
2023	21,250	104,000	50,100	75,150	16,875	108,375
2024	21,250	82,750	30,060	45,090	22,250	86,125
2025	21,250	61,500	18,036	27,054	30,000	56,125
2026	21,250	40,250	8,054	19,000	37,125	19,000
2027	21,250	19,000	0	19,000	0	19,000

Calculations:

- $125,250 - 19,000 = 106,250/5 = 21,250$
- $2/5 = .4$ or 40%; $.4 \times 125,250 = 50,100$; $.4 \times (125,250 - 50,100) = 30,060$;
 $.4 \times (125,250 - 50,100 - 30,060) = 18,036$;
 $.4 \times (125,250 - 50,100 - 30,060 - 18,036) = 10,822$; maximum = 8,054 calculated as cost less residual = $125,250 - 19,000 = 106,250$ less total deprec. taken of 98,196 = 8,054.
- $125,250 - 19,000 = 106,250/8,500 = \$12.50/\text{hour}$;
 2023– $12.50 \times 1,350 = 16,875$;
 2024– $12.50 \times 1,780 = 22,250$;
 2025– $12.50 \times 2,400 = 30,000$;
 2026– $12.50 \times 2,980 = 37,250$; maximum = 37,125; calculated as cost less residual = $125,250 - 19,000 = 106,250$ less total deprec. taken of 69,125 = 37,125.

Analysis component:

- a. 2023– Units-of-production; 2026– Straight-line
- b. 2023– Double-declining-balance; 2026– Units-of-production

Exercise 9-9 (30 minutes)

PPE Asset	(a) Appraised Values	(b) Ratio of Individual Appraised Value to Total Appraised Value <i>(a) ÷ Total Appraised Value</i>	(c) Cost Allocation <i>(b) x Total Actual Cost</i>
Land	\$ 700,000	$700,000 \div 2,100,000 = .33$ or 33.33%	\$ 840,000 ¹
Building	1,120,000	$1,120,000 \div 2,100,000 = .533$ or 53.33%	1,344,000 ²
Equipment	210,000	$210,000 \div 2,100,000 = .10$ or 10%	252,000 ³
Tools	<u>70,000</u>	$70,000 \div 2,100,000 = .033$ or 3.33%	<u>84,000</u> ⁴
Totals	<u>\$ 2,100,000</u>		<u>\$ 2,520,000</u>

1. $33.33\% \times 2,520,000 = 840,000$
2. $53.33\% \times 2,520,000 = 1,344,000$
3. $10.00\% \times 2,520,000 = 252,000$
4. $3.33\% \times 2,520,000 = 84,000$

PPE Asset	Cost	2023 Depreciation	2024 Depreciation
Land	\$ 840,000	N/A ⁵	N/A ⁵
Building	1,344,000	$1,344,000 \times 2/10 = 268,800$	$(1,344,000 - 268,800) \times 2/10 = 215,040$
Equipment	252,000	$252,000 \times 2/5 = 100,800$	$(252,000 - 100,800) \times 2/5 = 60,480$
Tools	84,000	$84,000 \times 2/3 = 56,000$	$(84,000 - 56,000) \times 2/3 = 18,667$

5. Land is not depreciated as it has an unlimited life and is not consumed when used.

Analysis component:

We do not depreciate the cost of land as it has an unlimited life and is not consumed when used.

Exercise 9-10 (20 minutes)

Cost Information						Depreciation		
Description	Date of Purchase	Depreciation Method	Cost	Residual	Life	Balance of Accum. Deprec. Dec. 31, 2022	Depreciation Expense for 2023	Balance of Accum. Deprec. Dec. 31, 2023
Building	2 May 2017	S/L	\$650,000	\$250,000	10 yr.	\$226,667	\$40,000 ¹	\$266,667 ²
Modular Furniture	2 May 2017	S/L	72,000	0	6 yr.	68,000	4,000 ³	72,000 ⁴
Truck	25 Jan 2020	DDB	80,000	10,000	8 yr.	45,313	8,672 ⁵	53,985 ⁶

- $(650,000 - 250,000)/10 = 40,000/\text{year}$
- $226,667 + 40,000 = 266,667$
- $(72,000 - 0)/6 = 12,000$ per year; however, the maximum accumulated depreciation = 72,000; 72,000 less total depreciation taken of 68,000 (8,000 in 2017 $[(72,000 - 0)/6 = \$12,000 \text{ per year} \times 8/12]$ plus 12,000 in years 2018 – 2022) = 4,000
- $68,000 + 4,000 = 72,000$
- Rate = $2/8 = .25$ or 25%
 $25\% \times (80,000 - 45,313) = 8,672$
- $45,313 + 8,672 = 53,985$

Analysis component:

Depreciation is the process of allocating an asset's cost to expense over its useful life. It should be done using a rational and systematic manner. Dynamic uses the straight-line method and the double-declining balance method for its assets, which are both acceptable under GAAP. Dynamic has likely chosen different methods for depreciating its assets to better reflect the usage pattern of each asset, which is acceptable under GAAP.

Exercise 9-11 (15 minutes)

DYNAMIC EXPLORATION
Partial Balance Sheet
December 31, 2022

Assets

Current assets			\$338,000
Property, plant and equipment:			
Furniture	\$72,000		
Less: Accumulated depreciation	<u>68,000</u>	\$4,000	
Building	\$650,000		
Less: Accumulated depreciation	<u>226,667</u>	423,333	
Truck.....	\$ 80,000		
Less: Accumulated depreciation	<u>45,313</u>	<u>34,687</u>	
Total property, plant and equipment.....			<u>462,020</u>
Total assets			<u>\$800,020</u>

Exercise 9-12 (15 minutes)

a. Straight-line depreciation:

	Year 1	Year 2	Year 3	Year 4	Year 5	5-Year Totals
Profit before depreciation	\$180,000	\$180,000	\$180,000	\$180,000	\$180,000	\$900,000
Depreciation expense ¹ ..	73,980	73,980	73,980	73,980	73,980	369,900
Profit.....	\$106,020	\$106,020	\$106,020	\$106,020	\$106,020	\$530,100

b. Double-declining-balance depreciation:

	Year 1	Year 2	Year 3	Year 4	Year 5	5-Year Totals
Profit before depreciation	\$180,000	\$180,000	\$180,000	\$180,000	\$180,000	\$900,000
Depreciation expense ² ..	193,560	116,136	60,204	0	0	369,900
Profit (loss)	\$(13,560)	\$63,864	\$119,796	\$180,000	\$180,000	\$530,100

a. $(\$483,900 - \$114,000)/5 = \$73,980$

b. Rate = $2/5 = .40$ or 40%

Depreciation expenses:

Year 1: $\$483,900 \times 40\% = \$193,560$

Year 2: $(\$483,900 - \$193,560) \times 40\% = \$116,136$

Year 3: \$60,204 max. depreciation expense (calculated as $\$483,900 - \$114,000 - \$193,560 - \$116,136 = \$60,204$)

Analysis component:

Kenartha Oil will choose straight-line depreciation to depreciate the equipment if its goal is to show the highest value possible for the equipment on the Year 1 balance sheet. Straight-line will result in lower depreciation than double declining balance in Year 1. The lower the depreciation, the greater the net book value of the asset (cost less accumulated depreciation appearing in the balance sheet).

Exercise 9-13 (15 minutes)

	Depreciation	
Year	Straight-Line ¹	Units-of-Production ³
2021	7,800	23,220
2022	23,400	42,660
2023	23,400	34,560

1. Straight-Line:

$$\$168,000 - \$27,600 = \$140,400/6 = \$23,400 \times 4/12 = \$7,800$$

2. Units-of-Production:

$$\$168,000 - \$27,600 = \$140,400/260,000 = \$0.540/\text{unit};$$

$$\$0.540 \times 43,000 = \$23,220;$$

$$\$0.540 \times 79,000 = \$42,660;$$

$$\$0.540 \times 64,000 = \$34,560.$$

Analysis component:

If depreciation is not recorded, expenses are understated and net income is overstated on the income statement and on the balance sheet, assets and equity would be overstated.

Exercise 9-14 (25 minutes)

	Depreciation	
Year	Straight-Line ¹	Double-Declining-Balance ²
2022	11,000	22,000
2023	22,000	35,200
2024	22,000	21,120

Calculations:

$$1. \quad 110,000/5 = 22,000 \times 6/12 = 11,000$$

$$2. \quad 2/5 = .4 \text{ or } 40\%; .4 \times 110,000 \times 6/12 = 22,000;$$

$$.4 \times (110,000 - 22,000) = 35,200; .4 \times (110,000 - 22,000 - 35,200) = 21,120$$

Analysis component:

If the furniture had been debited to an expense account in 2022 when purchased instead of being recorded as a PPE asset, expenses would have been overstated and net income would have been understated on the income statement in 2022 while assets and equity would have been understated on the balance sheet for the same year.

Exercise 9-15 (10 minutes)

	(a)	(b)
<u>Year</u>	<u>Straight-Line</u>	<u>Double-Declining-Balance</u>
2023	$(125,000 - 12,500)/5 = 22,500 \times 9/12 = 16,875$	Rate = $2/5 = .40$ or 40% $125,000 \times 40\% \times 9/12 = 37,500$
2024	$(125,000 - 12,500)/5 = 22,500$	$(125,000 - 37,500) \times 40\% = 35,000$

Exercise 9-16 (10 minutes)

Dec. 31	Depletion Expense—Mineral Deposit	405,528	
	Accumulated Depletion—Mineral Deposit		405,528
	<i>Record depletion [$\\$3,721,000/1,525,000$ tons = $\\$2.44$ per ton; $166,200$ tons $\times$ $\\$2.44$ = $\\$405,528$].</i>		
Dec. 31	Depreciation Expense—Machinery	23,268	
	Accumulated Depreciation—Machinery.....		23,268
	<i>Record depreciation [$\\$213,500/1,525,000$ tons= $\\$0.14$ per ton; $166,200$ tons $\times$ $\\$0.14$ = $\\$23,268$].</i>		

Exercise 9-17 (10 minutes)*Part 1*

Jan.1	Iron Ore Mine	760,000	
	Cash		760,000

Record purchase of iron ore mine

Jan.1	Iron Ore Mine	60,000	
	Cash		60,000

*Record purchase of iron ore mine access costs**Part 2*

Dec. 31	Depletion Expense—iron ore mine.....	144,000	
	Iron Ore Inventory.....	16,000	
	Accumulated Depletion – Iron Ore mine.....	160,000	

Record depletion [$\$(820,000-\$20,000)/100,000$ tons = $\$8$ per ton; $18,000$ tons $\times$ $\$8$ = $\$144,000$]. Record inventory not yet sold [$(20,000 - 18,000)$ tons $\times$ $\$8$ per ton = $\$16,000$]

Exercise 9-18 (10 minutes)

- $(43,500 - 5,000)/4 = 9,625/\text{year} \times 2 \text{ years} = 19,250$ accumulated depreciation
Book value = $43,500 - 19,250 = \underline{24,250}$
- $[(43,500 - 19,250) - 3,850]/3 = \underline{6,800}$

Exercise 9-19 (15 minutes)

2026

Dec. 31	Depreciation Expense, Machine	7,624	
	Accumulated Depreciation, Machine		7,624
	<i>To record depreciation.</i>		

Calculations:

$$\text{Revised depreciation} = \frac{(71,200 - 30,800^*) - 8,000}{7 - 2 \frac{9}{12} = 4.25 \text{ yrs}} = \underline{7,624/\text{year}}$$

$$*2023 \text{ depreciation} = 8,400 (71,200 - 15,200)/5 = 11,200 \times 9/12$$

$$2024 \text{ depreciation} = 11,200$$

$$2025 \text{ depreciation} = \underline{11,200}$$

$$\begin{array}{l} \text{Accumulated} \\ \text{depreciation} \end{array} \quad \underline{30,800}$$

Exercise 9-20 (20 minutes)

Part 1

2023

Jan. 5	Warehouse – Door.....	25,500	
	Accounts Payable.....		25,500
	<i>To record addition of door on East wall of warehouse.</i>		

Part 2

2023

Dec. 31	Depreciation Expense, Warehouse	14,700	
	Accumulated Depreciation, Warehouse....		14,700
	<i>To record revised depreciation on warehouse;</i>		
	$\$292,500 - \$90,000 = \$202,500; \$202,500 \div 15 \text{ yrs} = \$13,500$		
	$PLUS \$25,500 - \$7,500 = \$18,000; \$18,000 \div 15 \text{ yrs} = \$1,200;$		
	$Total \text{ depreciation on the warehouse} = \$13,500 + \$1,200 = \$14,700.$		

Exercise 9-21 (15 minutes)

1.	Original cost of machine	\$ 23,860
	Less two years' accumulated depreciation	
	$[(\$23,860 - \$2,400) / 4 \text{ years}] \times 2 \text{ years}$	<u>(10,730)</u>
	Book value at end of second year	<u>\$ 13,130</u>
2.	Book value at end of second year	\$ 13,130
	Less revised salvage value	<u>(2,000)</u>
	Remaining depreciable cost	\$ 11,130

$$\text{Revised annual depreciation} = \$11,130 / 3 \text{ years} = \underline{\$3,710}$$

Exercise 9-22 (30 minutes)**Part 1**

2023			
Dec. 31	Impairment Loss	13,500	
	Equipment		12,000
	Office Building		1,500
	<i>To record impairment loss on equipment and office building.</i>		

Part 2

2024			
Dec. 31	Depreciation Expense, Equipment	1,800	
	Accumulated Depreciation, Equipment		1,800
	<i>To record revised depreciation on equipment.</i>		
31	Depreciation Expense, Furniture	491	
	Accumulated Depreciation, Furniture		491
	<i>To record depreciation on furniture.</i>		
31	Depreciation Expense, Office Building	3,838	
	Accumulated Depreciation, Office Building		3,838
	<i>To record depreciation on office building</i>		
31	Depreciation Expense, Warehouse	2,250	
	Accumulated Depreciation, Warehouse		2,250
	<i>To record depreciation on warehouse.</i>		

Calculations:

Asset	Cost	Accum. Deprec.	Book Value	Recoverable Amount	Impairment Loss	2024 Dep. Exp.
Equipment	\$40,000	\$20,000	\$20,000	\$ 8,000	\$12,000	1,800 ¹
Furniture	12,000	9,509	2,491	2,950	N/A	491 ²
Land	85,000	N/A	85,000	101,800	N/A	N/A
Office Building	77,000	23,000	54,000	52,500	1,500	3,838 ³
Warehouse	55,000	12,938	42,062	45,100	N/A	2,250 ⁴

- $[40,000 - 5,000] / 7,000 = \$5.00/\text{unit}$; $20,000 \text{ accum. dep.} \div \$5.00/\text{unit} = 4,000 \text{ units}$; 7,000 units in original useful life less 4,000 units depreciated to date equals 3,000 remaining units; $40,000 - 12,000 = 28,000$ revised cost; $28,000 - 20,000 \text{ accum. dep.} = 8,000$ revised book value; $8,000 - 5,000 \text{ residual value} = 3,000$; $3,000 \div 3,000 \text{ remaining units} = \$1.00/\text{unit}$ revised depreciation rate; $1.00/\text{unit} \times 1,800 \text{ units} = 1,800$
- $12,000 - 9,509 = 2,491$; $2,491 \times 2/8 = 623$ which exceeds maximum allowable; maximum allowable = 2,491 remaining book value – 2,000 residual = 491
- $77,000 - 1,500 = 75,500$ revised cost of office building; $75,500 - 23,000 = 52,500$ remaining book value; $(52,500 - 17,000) \div 9.25 \text{ yrs remaining useful life} = 3,838$
- $55,000 - 10,000 = 45,000$; $45,000 \div 20 \text{ yrs} = 2,250$

Exercise 9-23 (20 minutes)

a.

2023

Mar. 1	Accumulated Depreciation, Truck	21,850	
	Cash	20,150	
	Truck		42,000
	<i>To record the sale of the truck for \$20,150.</i>		

b.

Mar. 1	Accumulated Depreciation, Truck	21,850	
	Cash	21,600	
	Truck		42,000
	Gain on Disposal		1,450
	<i>To record the sale of the truck for \$21,600.</i>		

c.

Mar. 1	Accumulated Depreciation, Truck	21,850	
	Cash	19,200	
	Loss on Disposal	950	
	Truck		42,000
	<i>To record the sale of the truck for \$19,200.</i>		

d.

Mar. 1	Accumulated Depreciation, Truck	21,850	
	Loss on Disposal	20,150	
	Truck		42,000
	<i>To record the sale of the truck for \$0; it was scrapped.</i>		

Exercise 9-24 (15 minutes)

To record partial year's depreciation in 2021:

2024			
July 1	Depreciation Expense.....	21,200	
	Accumulated Depreciation, Machine		21,200
	<i>To record partial year depreciation in year of disposal; $(296,800/7) \times 6/12 = 21,200$.</i>		

	(a)		
July 1	Accumulated Depreciation, Machine	190,800*	
	Cash	112,000	
	Machine.....		296,800
	Gain on Disposal		6,000
	<i>To record sale of machine for 112,000.</i>		

	(b)		
1	Accumulated Depreciation, Machine	190,800*	
	Cash	96,000	
	Loss on Disposal.....	10,000	
	Machine.....		296,800
	<i>To record receipt of \$96,000 from insurance settlement.</i>		

$$*(296,800/7) \times 4.5 \text{ years} = \underline{\underline{190,800}}$$

Exercise 9-25 (10 minutes)a. $\$202,000 - \$111,000 = \$91,000$ book value

b.		
Book value of the assets given up = $(\$91,000 + \$170,000)$	=	\$261,000
Less: Fair value of assets given up $(\$68,000 + \$170,000)$	=	\$238,000
Loss on exchange		\$23,000

c. & d. Tractor (new) = $\$68,000 + \$170,000 = \$238,000$

d.

2023			
Oct. 6	Tractor (new)*	238,000	
	Accumulated Depreciation, Tractor (old)	111,000	
	Loss on Exchange.....	23,000	
	Cash.....		170,000
	Tractor (old).....		202,000
	<i>To record exchange of old tractor for a new one.</i>		

Exercise 9-26 (20 minutes)

a.

2023

Nov. 3	Accumulated Depreciation, Computer (old)	65,000	
	Computer (new) ¹	175,000	
	Computer (old)		150,000
	Cash		90,000

To record exchange of computers.

1. Computer (new) = Cash paid + Book Value of asset given up
 = \$90,000 + \$85,000 = \$175,000

b.

2023

Nov. 3	Accumulated Depreciation, Computer (old)	65,000	
	Computer (new) ¹	174,000	
	Loss on Disposal ²	1,000	
	Computer (old)		150,000
	Cash		90,000

To record exchange of computers.

1. Computer (new) = Fair Value of Assets Received
 = \$174,000
2. Loss on Disposal = Proceeds – Book Value of assets given up
 = \$174,000 – [(\$150,000 – \$65,000) + \$90,000] = \$1,000

Analysis component:

The dollar value that will be used to depreciate the new computer is \$174,000 because the Cost Principle requires that all transactions are to be recorded at their original cost. \$174,000 was determined to be the cost.

Exercise 9-27 (25 minutes)

(a)

Jan. 2	Accumulated Depreciation, Machine	50,450	
	Cash	44,500	
	Loss on Disposal.....	1,050	
	Machine.....		96,000
	<i>To record sale of machine;</i>		
	<i>44,500 – (96,000 – 50,450) = 1,050 loss.</i>		

(b)

Jan. 2	Accumulated Depreciation, Machine	50,450	
	Tools.....	134,550	
	Cash.....		89,000
	Machine.....		96,000
	<i>To record exchange of machine;</i>		
	<i>Value of assets given up = \$89,000 cash + \$45,550</i>		
	<i>book value of the old machine = \$134,550.</i>		

(c)

Jan. 2	Accumulated Depreciation, Machine	50,450	
	Van	116,000	
	Loss on Disposal.....	9,550	
	Cash.....		80,000
	Machine.....		96,000
	<i>To record exchange of machine;</i>		
	<i>116,000 – (80,000 + 45,550) = 9,550 loss.</i>		

(d)

Jan. 2	Accumulated Depreciation, Machine	50,450	
	Land.....	87,000	
	Machine.....		96,000
	Cash.....		37,000
	Gain on Disposal		4,450
	<i>To record exchange;</i>		
	<i>87,000 – (37,000 + 45,550) = 4,450 gain.</i>		

Exercise 9-28 (15 minutes)

1.	Equipment	22,000	
	Cash		22,000
	<i>Record betterment.</i>		
2.	Repairs Expense	6,250	
	Cash		6,250
	<i>Record ordinary repairs.</i>		
3.	<u>Equipment</u>	<u>14,870</u>	
	Cash		14,870
	<i>Record extraordinary repairs.</i>		

Exercise 9-29 (25 minutes)

1. Annual depreciation = \$572,000 / 20 years = \$28,600 per year

$$\begin{aligned}\text{Age of the building} &= \text{Accumulated depreciation} / \text{Annual depreciation} \\ &= \$429,000 / \$28,600 = \underline{15 \text{ years}}\end{aligned}$$

2. Entry to record the extraordinary repairs

Building	68,350	
Cash		68,350
<i>Record extraordinary repairs.</i>		

3.	Cost of building		
	Before repairs	\$572,000	
	Add cost of repairs	<u>68,350</u>	\$640,350
	Less accumulated depreciation		<u>429,000</u>
	Revised book value of building		<u>\$211,350</u>
4.	Revised book value of building (part 3)		\$211,350
	New estimate of useful life (20 - 15 + 5)		10 years
	Revised annual depreciation		<u>\$ 21,135</u>

1. Journal entry

Depreciation Expense	21,135	
Accumulated Depreciation—Building		21,135
<i>Record depreciation.</i>		

Exercise 9-30 (10 minutes)

2023		
Jan.	1	Copyrights 177,480
		Cash 177,480
		<i>To record purchase of copyright.</i>
Dec.	31	Amortization Expense, Copyrights 14,790
		Accumulated Amortization, Copyrights 14,790
		<i>To record amortization of copyright;</i>
		<i>177,480/12 = 14,790</i>

Exercise 9-31 (15 minutes)

Part 1

2023		
Sept.	5	Timber Rights 432,000
		Cash 96,000
		Long-Term Notes Payable 336,000
		<i>To record purchase of timber rights.</i>
	27	Patent 148,000
		Accounts Payable 148,000
		<i>To record purchase of patent.</i>

Part 2

2023		
Dec.	31	Amortization Expense, Timber Rights 48,000
		Accumulated Amort., Timber Rights 48,000
		<i>To record amortization of timber rights;</i>
		<i>\$432,000 ÷ 3 yrs = \$144,000/year × 4/12 = \$48,000.</i>
	31	Amortization Expense, Patent 3,700
		Accumulated Amortization, Patent 3,700
		<i>To record amortization of patent;</i>
		<i>\$148,000 ÷ 10 yrs = \$14,800/year × 3/12 = \$3,700.</i>
2024		
Dec.	31	Amortization Expense, Timber Rights 144,000
		Accumulated Amortization, Timber Rights 144,000
		<i>To record amortization of timber rights;</i>
		<i>\$432,000 ÷ 3 yrs = \$144,000/year.</i>
	31	Amortization Expense, Patent 14,800
		Accumulated Amortization, Patent 14,800
		<i>To record amortization of patent;</i>
		<i>\$148,000 ÷ 10 yrs = \$14,800/year.</i>

Exercise 9-32 (20 minutes)

Note: Book value of machine = \$250,000 - \$182,000 = \$68,000

1. Disposed at no value

Jan. 1	Loss on Disposal of Machine	68,000	
	Accumulated Depreciation—Machine	182,000	
	Machine.....		250,000
	<i>Record disposal of machine.</i>		

2. Sold for \$35,000 cash

Jan. 1	Cash	35,000	
	Loss on Sale of Machine.....	33,000	
	Accumulated Depreciation—Machine	182,000	
	Machine.....		250,000
	<i>Record cash sale of machine.</i>		

3. Sold for \$68,000 cash

Jan. 1	Cash	68,000	
	Accumulated Depreciation—Machine	182,000	
	Machine.....		250,000
	<i>Record cash sale of machine.</i>		

4. Sold for \$80,000 cash

Jan. 1	Cash	80,000	
	Accumulated Depreciation—Machine	182,000	
	Gain on Sale of Machine		12,000
	Machine.....		250,000
	<i>Record cash sale of machine.</i>		

Exercise 9-33 (25 minutes)

Huang Resources
Balance Sheet
October 31, 2023

Assets

Current assets:

Cash.....		\$ 9,600	
Accounts receivable	\$ 27,200		
Less: Allowance for doubtful accounts.....	<u>1,920</u>	<u>25,280</u>	
Total current assets			\$ 34,880

Property, plant and equipment:

Land		\$ 89,600	
Building.....	\$ 147,200		
Less: Accumulated depreciation	<u>81,600</u>	65,600	
Equipment	\$184,000		
Less: Accumulated depreciation	<u>110,400</u>	<u>73,600</u>	
Total property, plant and equipment.....			228,800

Intangible assets:

Mineral rights	\$ 57,600		
Less: Accumulated amortization	<u>30,400</u>	\$ 27,200	
Trademark	\$ 33,600		
Less: Accumulated amortization	<u>22,400</u>	<u>11,200</u>	
Total intangible assets			<u>38,400</u>

Total assets			<u>\$302,080</u>
--------------------	--	--	------------------

Liabilities

Current liabilities:

Accounts payable.....	\$18,400		
Current portion of long-term note	<u>34,000</u>		
Total current liabilities		\$ 52,400	

Non-current liabilities:

Note payable, less current portion.....		<u>38,000</u>	
---	--	---------------	--

Total liabilities			\$ 90,400
-------------------------	--	--	-----------

Equity

Sally Huang, capital			<u>211,680¹</u>
----------------------------	--	--	----------------------------

Total liabilities and equity.....			<u>\$302,080</u>
-----------------------------------	--	--	------------------

Calculations:

- 221,280 adjusted capital balance + 1,433,600 revenues – 1,443,200 expenses = 211,680 post-closing capital balance

Exercise 9-34 (35 minutes)

Montalvo Bionics
Balance Sheet
April 30, 2023

Assets

Current assets:

Cash.....		\$ 10,100	
Accounts receivable	\$17,300		
Less: Allowance for doubtful accounts.....	<u>1,010</u>	16,290	
Prepaid rent.....		<u>1,355</u> ¹	
Total current assets			\$ 27,745

Property, plant and equipment:

Furniture	\$22,700		
Less: Accumulated depreciation	<u>14,730</u> ²	\$ 7,970	
Machinery.....	\$50,800		
Less: Accumulated depreciation	<u>22,700</u> ³	<u>28,100</u>	
Total property, plant and equipment.....			36,070

Intangible assets:

Patent.....		\$24,900	
Less: Accumulated amortization		<u>830</u> ⁴	<u>24,070</u>
Total assets			<u>\$87,885</u>

Liabilities

Current liabilities:

Accounts payable.....	\$5,080		
Unearned revenues	5,870		
Current portion of long-term note	<u>6,500</u>		
Total current liabilities		\$ 17,450	

Non-current liabilities:

Note payable, less current portion.....		<u>8,100</u>	
Total liabilities			\$25,550

Equity

Josh Montalvo, capital.....			<u>62,335</u> ⁵
Total liabilities and equity.....			<u>\$87,885</u>

Calculations:

1. $\$16,260 \times 11/12 = \$14,905$ rent used; $\$16,260 - \$14,905 = \$1,355$ remaining in Prepaid Rent.
2. $\$22,700 \div 5 = \$4,540$; $\$4,540 + \$10,190 = \$14,730$ accum. dep.
3. $\$50,800 - \$20,200 = \$30,600$; $\$30,600 \times 2/10 = \$6,120$; maximum depreciation is $\$50,800 - \$28,100 = \$22,700$ therefore 2023 depreciation expense is $\$2,500$ and accum. dep. is $\$20,200 + \$2,500 = \$22,700$.
4. $\$24,900 \div 15 = \$1,660/\text{year}$; $\$1,660 \times 6/12 = \830 .
5. $\$32,910$ unadjusted capital + $\$225,400$ revenues – $\$83,900$ withdrawals – $\$89,300$ expenses – $\$4,540$ dep. furniture – $\$2,500$ dep. machinery – $\$830$ amort. patent – $\$14,905$ rent expense = $\$62,335$ post-closing capital.

Exercise 9-35 (30 minutes)

2021

April 1	Food Truck	52,000	
	Oven.....	6,000	
	Prepaid Insurance	3,600	
	Cash		61,600

To record the purchase of food truck, oven and insurance.

Oct 1	Repairs Expense	1,800	
	Cash		1,800

To record repairs for truck

Dec 31	Insurance Expense	2,700	
	Prepaid Insurance.....		2,700

To record 9 months of insurance expense

Dec 31	Depreciation Expense, Truck.....	6,300	
	Accumulated Depreciation, Truck.....		6,300

*To record depreciation of truck;**Calculation:*

$$[(48,000 + 4,000) - 10,000] / 5 \text{ years} = 8,400 \times 9/12 = \$6,300.$$

31	Depreciation Expense, Oven	750	
	Accumulated Depreciation, Oven.....		750

To record depreciation of oven;

$$(\$6,000 - 1000) \div 5 \text{ yrs} = \$1,000/\text{year} \times 9/12 = \$750.$$

2022

April 1	Repair Expense	2,100	
	Prepaid Insurance	3,600	
	Cash.....		5,700

To record purchase of tires and insurance for year

Dec 31	Insurance Expense.....	3,600	
--------	------------------------	-------	--

	Prepaid Insurance.....		3,600
	<i>To record 1 year of insurance expense.</i>		
Dec 31	Depreciation Expense, Truck.....	8,400	
	Accumulated Depreciation, Truck		8,400
	<i>To record depreciation of truck;</i>		
	<i>Calculation:</i>		
	$[(48,000 + 4,000) - 10,000] / 5 \text{ years} = 8,400$		
31	Depreciation Expense, Oven	1,000	
	Accumulated Depreciation, Oven.....		1,000
	<i>To record depreciation of oven;</i>		
	$(\$6,000-1000) \div 5 \text{ yrs} = \$1,000/\text{year}$		
2023			
Mar 31	Depreciation Expense, Truck	2,100	
	Accumulated Depreciation, Truck		2,100
	<i>To record partial year depreciation in</i>		
	<i>year of disposal; $8,400 \times 3/12 = 2,100$.</i>		
Mar 31	Depreciation Expense, Oven.....	250	
	Accumulated Depreciation, Oven		250
	<i>To record partial year depreciation in</i>		
	<i>year of disposal; $1000 \times 3/12 = 250$.</i>		
Mar 31	Accumulated Depreciation, Truck.....	16,800	
	Accumulated Depreciation, Oven	2,000	
	Cash	21,000	
	Loss on Disposal.....	18,200	
	Truck		52,000
	Oven.....		6,000
	<i>To record loss on sale of truck;</i>		
	$16,800+2,000+21,000-52,000-6,000=18,200$		

***Exercise 9-36 (30 minutes)**

Part 1

2023

Jul. 3 Truck – Tool Carrier..... 9,600

Cash 9,600

To record installation of new component to truck.

Part 2

Truck:							
Component	Date of Purchase	Cost	Est. Resid.	Est. Life	Accum. Dep. at Dec 31/22	Dep. Exp. Dec 31/23	Dep. Exp. Dec 31/24
Truck body	Jul 7/21	\$ 28,000	-0-	10 yr	\$ 4,200	\$ 2,800 ¹	\$ 2,800 ¹
Motor	Jul 7/21	8,000	-0-	10 yr	1,200	800 ²	800 ²
Tool Carrier	Jul 3/23	9,600	-0-	8 yr	-0-	600 ³	1,200 ³
		<u>\$ 45,600</u>			<u>\$ 5,400</u>	<u>\$4,200</u>	<u>\$4,800</u>

Calculations:

1. $28,000 \div 10 \text{ yrs} = 2,800/\text{yr}$
2. $8,000 \div 10 \text{ yrs} = 800/\text{yr}$
3. $9,600 \div 8 \text{ yrs} = 1,200/\text{yr} \times 6/12 = 600$ for partial period in 2023

Part 3

Book value of truck at December 31, 2023:

 $\$45,600 \text{ total cost} - (\$5,400 + \$4,200 = \$9,600) = \$36,000$

Book value of truck at December 31, 2024:

 $\$36,000 - \$4,800 = \$31,200$

PROBLEMS**Problem 9-1A (25 minutes)***Part 1*

	<u>Land</u>	<u>Building Two</u>	<u>Building Three</u>	<u>Land Impmnts. One</u>	<u>Land Impmnts. Two</u>
Purchase price*	\$2,924,800	\$1,051,100		\$594,100

Total property, plant and equipment.....		354,320		248,800
Intangible assets:				
Franchise.....	\$ 41,600		\$ 41,600	
Less: Accumulated amortization.....	<u>19,200</u>	22,400	<u>11,200</u>	30,400
Patent.....	\$ 16,000		\$ 16,000	
Less: Accumulated amortization.....	<u>4,000</u>	<u>12,000</u>	<u>2,400</u>	<u>13,600</u>
Total intangible assets.....		<u>34,400</u>		<u>44,000</u>
Total assets.....		<u>\$443,120</u>		<u>\$371,920</u>
Liabilities				
Current liabilities:				
Accounts payable.....	\$ 56,800		\$ 9,600	
Salaries payable.....	<u>32,800</u>		<u>26,400</u>	
Total current liabilities.....		\$ 89,600		\$ 36,000
Non-current liabilities:				
Notes payable, due in 2023.....		<u>240,000</u>		<u>129,600</u>
Total liabilities.....		\$329,600		\$165,600
Equity				
Lee Derlak, capital.....		<u>113,520</u> *		<u>206,320</u>
Total liabilities and equity.....		<u>\$443,120</u>		<u>\$371,920</u>
*206,320 – 32,000 – 780,800 + 720,000 = 113,520				

Analysis component:

Derlak's assets are financed mainly by equity in 2022. In 2023, the assets are financed largely by debt. The change from 2022 to 2023 in how assets were mainly financed (from equity to debt) is unfavourable because the greater the debt the greater the risk associated with debt (is/will Derlak be in a position to pay the interest and principal as it comes due).

Problem 9-3A (25 minutes)

Year	a. Straight-Line	b. Double-Declining-Balance	c. Units-of-Production
2021	\$33,250	\$84,000	\$27,930
2022	\$33,250	\$42,000	\$30,485
2023	\$33,250	\$7,000	\$37,940
2024	\$33,250		\$36,645
Total	\$133,000	\$133,000	\$133,000

Explanation:

a.

$$(\$168,000 - \$35,000)/4 = \$33,250/\text{year}$$

b.

Double-declining-balance (Rate = $2/4 = 0.50$ or 50%):

$$50\% \times \$168,000 = \$84,000$$

$$50\% \times (\$168,000 - \$84,000) = \$42,000$$

Maximum depreciation is limited to \$133,000 which is cost less residual (\$168,000 – \$35,000) therefore depreciation for 2023 is \$7,000 calculated as \$133,000 – \$126,000 accumulated depreciation recorded to date.

c.

Units-of-production: (Rate = $[(\$168,000 - \$35,000)/190,000] = \$0.70/\text{unit}$)

$$\$27,930 (\$0.70 \times 39,900)$$

$$\$30,485 (\$0.70 \times 43,550)$$

$$\$37,940 (\$0.70 \times 54,200)$$

Maximum depreciation is limited to \$133,000 which is cost less residual (\$168,000 – \$35,000) therefore depreciation for 2024 is \$36,645 calculated as \$133,000 – \$96,355 accumulated depreciation recorded to date.

Problem 9-4A (25 minutes)

	2023	2024	2025
1. Purchased January 1, 2023			
A. Double-declining-balance method			
Equipment	\$415,000	\$415,000	\$415,000
Less: Accumulated depreciation	83,000	149,400	202,520
Year-end book value	\$332,000	\$265,600	\$212,480
Depreciation expense for the year ¹	\$83,000	\$66,400	\$53,120

B. Straight-line method

Equipment	\$415,000	\$415,000	\$415,000
Less: Accumulated depreciation	39,000	78,000	117,000
Year-end book value	\$376,000	\$337,000	\$298,000
Depreciation expense for the year	\$39,000 ²	\$39,000	\$39,000

1. Rate = $2/10 = 0.20$ or 20%
 2023: $0.20 \times 415,000 = 83,000$
 2024: $0.20 \times (415,000 - 83,000) = 66,400$
 2025: $0.20 \times (415,000 - 83,000 - 66,400) = 53,120$

2. $(415,000 - 25,000)/10 = 39,000$

	2023	2024	2025
2. Purchased July 1, 2023			
A. Double-declining-balance method			
Equipment	\$415,000	\$415,000	\$415,000
Less: Accumulated depreciation	41,500	116,200	175,960
Year-end book value	\$373,500	\$298,800	\$239,040
Depreciation expense for the year ³	\$41,500 ⁴	\$74,700	\$59,760

B. Straight-line method

Equipment	\$415,000	\$415,000	\$415,000
Less: Accumulated depreciation	19,500	58,500	97,500
Year-end book value	\$395,500	\$356,500	\$317,500
Depreciation expense for the year	\$19,500 ⁴	\$39,000	\$39,000

3. Rate = $2/10 = 0.20$ or 20%
 2023: $0.20 \times 415,000 \times 6/12 = 41,500$
 2024: $0.20 \times (415,000 - 41,500) = 74,700$
 2025: $0.20 \times (415,000 - 41,500 - 74,700) = 59,760$

4. $(415,000 - 25,000)/10 = 39,000 \times 6/12 = 19,500$

Problem 9-5A (25 minutes)

Year	Depreciation Method ¹ :		
	Straight-line	Double-declining balance	Units-of-production ²
2023	$(828,000 - 192,000)/10 = 63,600/\text{year} \times 10/12 = 53,000$	Rate = $2/10 = .20$ or 20% $828,000 \times 20\% \times 10/12 = 138,000$	Rate = $(828,000 - 192,000)/13,250 = 48/\text{hour}$ $48 \times 720 = 34,560$
2024	63,600	$(828,000 - 138,000) \times 20\% = 138,000$	$48 \times 1,780 = 85,440$
2025	63,600	$(828,000 - 138,000 - 138,000) \times 20\% = 110,400$	$48 \times 1,535 = 73,680$

1. Depreciation is calculated to the nearest month.
2. Assume actual hours of service were: 2023: 720; 2024: 1,780; 2025: 1,535.

Analysis component:

If you could ignore the matching principle, you might record the purchase of the boats as boat expense which means the entire cost of \$828,000 would have been expensed in 2023, the year of purchase. This would have resulted in the net income being understated in 2023 and, because of depreciation expense not being recorded, net income would be overstated in the remaining years of the asset's useful life as well. On the balance sheet, recording the purchase of the boats as boat expense would have caused assets and equity to be understated in each year of the asset's life. It is interesting to note that the error would self-correct by the end of the asset's life if it would have gone undetected.

Problem 9-6A (25 minutes)

Year	Depreciation Method ¹ :		
	Straight-line	Double-declining balance	Units-of-production ²
2023	$(828,000 - 192,000)/10 = 63,600/\text{year} \times 6/12 = 31,800$	Rate = $2/10 = .20$ or 20% $828,000 \times 20\% \times 6/12 = 82,800$	Same as Problem 9-4A; Units-of-production is usage based and not affected by time 34,560
2024	63,600	$(828,000 - 82,800) \times 20\% = 149,040$	85,440
2025	63,600	$(828,000 - 82,800 - 149,040) \times 20\% = 119,232$	73,680

1. Depreciation is calculated using the half-year convention.
2. Assume actual hours of service were: 2023: 720; 2024: 1,780; 2025: 1,535.

Problem 9-7A (15 minutes)**1.**

2024

Apr. 30	Depreciation Expense, Building	53,000	
	Accumulated Depreciation, Building.....		53,000
	<i>To record annual depreciation;</i>		
	<i>742,000/14 = 53,000.</i>		
30	Depreciation Expense, Equipment	77,184	
	Accumulated Depreciation, Equipment		77,184
	<i>To record annual depreciation;</i>		
	<i>Rate = 2/10 = .20 or 20%;</i>		
	<i>385,920 × 20% = 77,184.</i>		

2.

Big Sky Farms
Partial Balance Sheet
April 30, 2024

Property, plant and equipment:

Land.....		\$730,000
Building.....	\$742,000	
Less: Accumulated depreciation.....	<u>636,000</u>	106,000
Equipment.....	670,000	
Less: Accumulated depreciation.....	<u>361,264</u>	<u>308,736</u>
Total property, plant and equipment.....		<u><u>\$1,144,736</u></u>

Problem 9-8A (50 minutes)*Part 1*

	<i>Market Value</i>	<i>Percentage of Total</i>	<i>Apportioned Cost</i>
Building	\$652,800	48%	\$604,800
Land.....	462,400	34	428,400
Land improvements	68,000	5	63,000
Vehicles	<u>176,800</u>	<u>13</u>	<u>163,800</u>
Total.....	<u>\$1,360,000</u>	<u>100%</u>	<u>\$1,260,000</u>

2023

Mar. 1	Building	604,800	
	Land	428,400	
	Land Improvements	63,000	
	Vehicles	163,800	
	Cash.....		1,260,000
	<i>To record asset purchases.</i>		

Part 2 2023 straight-line depreciation on building:

$$(\$604,800 - \$41,040)/15 \times 10/12 = \underline{\$31,320}$$

Part 3 2023 double-declining-balance depreciation on land improvements:

$$\text{Rate} = 2/5 = .40 \text{ or } 40\%$$

$$\$63,000 \times 40\% \times 10/12 = \underline{\$21,000}$$

Analysis component:

If the assets purchased on March 1, 2023 were put into service on May 23, 2023 the depreciation expense calculated in parts 2 and 3 above would be based on 7 months instead of 10 months because straight-line and double-declining-balance depreciation are both based on the time the assets are actually USED during the period.

Problem 9-9A (30 minutes)

<u>Year</u>	<u>Straight-Line^a</u>	<u>Units-of-Production^b</u>	<u>Double-Declining-Balance^c</u>
2023	\$ 38,000	\$ 20,544	\$ 84,000
2024	114,000	117,504	210,000
2025	114,000	114,816	105,000
2026	114,000	113,472	52,500
2027	<u>76,000</u>	<u>89,664</u>	<u>4,500</u>
Totals	<u>\$456,000</u>	<u>\$456,000</u>	<u>\$456,000</u>

^aStraight-line:

$$\begin{aligned} \text{Cost per year} &= (504,000 - 48,000)/4 \text{ years} &= \$114,000 \text{ per year} \times 4/12 \\ & &= 38,000 \end{aligned}$$

^bUnits-of-production:

$$\text{Cost per unit} = (504,000 - 48,000)/475,000 \text{ units} = \$0.96 \text{ per unit}$$

<i>Year</i>	<i>Units</i>	<i>Unit Cost</i>	<i>Depreciation</i>
2023	21,400	\$0.96	\$ 20,544
2024	122,400	0.96	117,504
2025	119,600	0.96	114,816
2026	118,200	0.96	113,472
2027	102,000	0.96	<u>89,664*</u>
Total			<u>\$456,000</u>

*Take only enough depreciation in Year 2027 to reach the maximum accumulated depreciation of \$456,000 (which is cost less residual).

^cDouble-declining-balance:

$$\text{Rate} = 2/4 = .50 \text{ or } 50\%$$

$$2023: 50\% \times 504,000 \times 4/12 = 84,000$$

$$2024: 50\% \times (504,000 - 84,000) = 210,000$$

$$2025: 50\% \times (504,000 - 84,000 - 210,000) = 105,000$$

$$2026: 50\% \times (504,000 - 84,000 - 210,000 - 105,000) = 52,500$$

$$2027: 456,000 - 451,500^* = 4,500$$

*Take only enough depreciation in Year 2027 to reach the maximum accumulated depreciation of \$456,000 (which is cost less residual).

Problem 9-10A (30 minutes)

Cost Information						Depreciation		
Description	Date of Purchase	Depreciation Method	Cost	Residual	Life	Balance of Accum. Deprec. Dec. 31, 2023	Deprec. Expense for 2024	Balance of Accum. Deprec. Dec. 31, 2024
Office Equipment	March 27/20	Straight-line	\$52,000	\$14,000	10 yr.	14,250 ¹	3,800 ²	18,050 ³
Machinery	June 4/20	Double-declining balance	\$275,000	\$46,000	6 yr.	209,362 ⁴	19,638 ⁵	229,000 ⁶
Truck	Nov. 13/23	Units-of-production	\$113,000	\$26,000	250,000 km.	4,872 ⁷	23,664 ⁸	28,536 ⁹

- $[(\$52,000 - \$14,000)/10 = \$3,800/\text{year} \times 3] + [(\$52,000 - \$14,000)/10 \times 9/12] = \$14,250$
- $(\$52,000 - \$14,000)/10 = 3,800/\text{year}$
- $14,250 + 3,800 = 18,050$
- Rate = $2/6 = .3333$ or 33.33%
 $2020: 33.33\% \times 275,000 \times 7/12 = 53,472$
 $2021: 33.33\% \times (275,000 - 53,472) = 73,843$
 $2022: 33.33\% \times (275,000 - 53,472 - 73,843) = 49,228$
 $2023: 33.33\% \times (275,000 - 53,472 - 73,843 - 49,228) = \underline{32,819}$
Accumulated depreciation at Dec. 31, 2023 = \$209,362
- $2024: (275,000 - 46,000) 209,362 = \$19,638$
- $\$209,362 + \$19,638 = 229,000$
- Rate = $(113,000 - 26,000)/250,000 = \$0.348/\text{km}$; $14,000 \times 0.348 = 4,872$
- $68,000 \times 0.348 = 23,664$
- $4,872 + 23,664 = 28,536$

Problem 9-11A (20 minutes)

2023

Mar. 26	Delivery Truck	96,200	
	Cash		96,200
	<i>To record purchase of new truck; \$92,000 plus \$4,200 freight costs.</i>		
Dec. 31	Depreciation Expense, Delivery Truck ¹	12,930	
	Accumulated Depreciation, Delivery Truck		12,930
	<i>To record depreciation from Mar. 26 to Dec. 31, 2023.</i>		

2024

Dec. 31	Depreciation Expense, Delivery Truck ²	21,160	
	Accumulated Depreciation, Delivery Truck		21,160
	<i>To record depreciation.</i>		

$$1. (96,200 - 10,000)/5 \times 9/12 = 12,930$$

$$2. \frac{96,200 - 12,930 - 14,500}{4 - 9/12 = 3.25} = 21,160$$

Problem 9-12A (30 minutes)

2024

Dec. 31	Depreciation Expense, Machinery ¹	95,200	
	Accumulated Depreciation, Machinery		95,200
	<i>To record annual depreciation.</i>		
31	Depreciation Expense, Office Furniture ²	11,733	
	Accumulated Depreciation, Office Furniture		11,733
	<i>To record annual depreciation.</i>		

Calculations:

$$1. \frac{\begin{array}{r} \text{Cost} \\ 556,800 - \end{array} - \frac{\begin{array}{r} \text{Accumulated} \\ \text{Depreciation} \\ 246,400 - \end{array}}{2} - \begin{array}{r} \text{Residual} \\ 120,000 \end{array} = 95,200$$

$$2. \frac{\begin{array}{r} \text{Cost} \\ 89,600 - \end{array} - \frac{\begin{array}{r} \text{Accumulated} \\ \text{Depreciation} \\ 49,600 - \end{array}}{5 - 2 = 3} - \begin{array}{r} \text{Residual} \\ (11,200 - \\ 6,400) \end{array} = 11,733$$

Problem 9-13A (20 minutes)**Part 1**

2023

Jan. 7	Machine #5027 – Blade (new)	10,400	
	Accumulated Depreciation, Machine #5027 – Blade	2,688 ¹	
	Loss on Disposal	5,032	
	Machine #5027 – Blade (old)		7,720
	Cash		10,400

*To record installation of replacement blade.**Calculations:*

1. $7,720 - 1,000 = 6,720$; $6,720 \div 5 \text{ yrs} = 1,344$ deprec. for 2021;
 $1,344 + 1,344$ deprec. for 2022 = 2,688 accum. deprec. at Dec. 31, 2022.

Part 2

Metal	$44,000 - 8,000 = 36,000$; $36,000 \div 15 \text{ yrs} = 2,400$ for 2021 <i>PLUS</i>	
Housing	$2,400$ for 2022 = 4,800 accum. deprec. at Dec. 31/2022; Revised deprec. = $44,000 - 4,800 = 39,200$ book value; $39,200 - 8,600$ residual = 30,600 depreciable cost; $30,600 \div 18 \text{ years}^* =$	\$1,700

**20 years – 2 yrs already depreciated = 18 yr remaining life*

Motor	2021: $26,000 \times 2/10 = 5,200$ 2022: $26,000 - 5,200 = 20,800 \times 2/10 = 4,160$ 2023: $20,800 - 4,160 = 16,640 \times 2/10 =$	3,328
Blade	$10,400 - 1,000 = 9,400$; $9,400 \div 5 \text{ yrs} =$	<u>1,880</u>
Total depreciation expense to be recorded on Machine #5027 for 2023=		<u><u>\$6,908</u></u>

Problem 9-14A (40 minutes)

Part 1

2023

Oct. 31	Impairment Loss	24,200	
	Equipment.....		24,200
	<i>To record impairment loss on equipment.</i>		
31	Impairment Loss	14,300	
	Furniture		14,300
	<i>To record impairment loss on furniture.</i>		

**Calculations:*

	Book Value	Recoverable Value	Impairment Loss
Land	\$105,600	\$136,400	NA
Building	57,200	105,600	NA
Equipment	52,800	28,600	\$24,200
Furniture	29,700	15,400	14,300

Problem 9-14A (concluded)

Part 2

Safety-First Company
Balance Sheet
October 31, 2023

Assets

Current assets:

Cash		\$ 11,000	
Accounts receivable	\$ 19,800		
Less: Allowance for doubtful accounts	<u>880</u>	18,920	
Merchandise inventory		<u>35,200</u>	
Total current assets			\$ 65,120

Property, plant and equipment:

Land		\$105,600	
Building	\$136,400		
Less: Accumulated depreciation	<u>79,200</u>	57,200	
Equipment	\$66,000 ¹		
Less: Accumulated depreciation	<u>37,400</u>	28,600	
Furniture	\$36,300 ²		
Less: Accumulated depreciation	<u>20,900</u>	<u>15,400</u>	
Total property, plant and equipment			<u>206,800</u>
Total assets			<u>\$271,920</u>

Liabilities

Current liabilities:

Accounts payable	\$ 11,220	
Unearned revenues	7,920	
Current portion of long-term note	<u>26,400</u>	
Total current liabilities		\$ 45,540

Non-current liabilities:

Note payable, less current portion	<u>59,400</u>	
--	---------------	--

Total liabilities		\$104,940
-------------------------	--	-----------

Equity

Tarifa Sharma, capital	<u>166,980</u> ³	
Total liabilities and equity		<u>\$271,920</u>

Calculations:

- 90,200 cost – 24,200 impairment loss = 66,000
- 50,600 cost – 14,300 impairment loss = 36,300
- 62,480 adjusted capital balance + 904,200 sales – 761,200 expenses – 24,200 impairment loss, equip. – 14,300 impairment loss, furn. = 166,980 post-closing capital balance

Analysis component:

An impairment loss causes net income to decrease on the income statement. On the balance sheet, an impairment loss causes total assets to decrease because of the decrease in property, plant and equipment. Equity also decreases on the balance sheet as a result of the decreased net income.

Problem 9-15A (30 minutes)

1.

2024

Sept. 27	Depreciation Expense, Building	4,950	
	Accumulated Depreciation, Building ¹		4,950
	<i>To record building depreciation for 2024.</i>		

27	Cash	592,000	
	Accumulated Depreciation, Building ²	398,550	
	Gain on Disposal.....		67,350
	Land.....		396,800
	Building		526,400
	<i>To record sale of land and building.</i>

	Accumulated Amortization, Mineral Rights.....		13,000
	<i>To record amortization on the mineral rights;</i>		
	$\$62,400 \div 4 \text{ years} = \$15,600/\text{year} \times 10/12 = \$13,000.$		
31	Depreciation Expense, Equipment.....	51,000	
	Accumulated Depreciation, Equipment		51,000
	<i>To record depreciation on the equipment;</i>		
	$\$244,800 \div 4 \text{ years} = \$61,200/\text{year} \times 10/12 = \$51,000.$		
31	Depreciation Expense, Truck.....	19,875	
	Accumulated Depreciation, Truck		19,875
	<i>To record depreciation on the truck;</i>		
	$\$95,400 \div 4 \text{ years} = \$23,850/\text{year} \times 10/12 = \$19,875.$		

Part 2

2026

Oct. 31	Accumulated Amortization, Mineral Rights	57,200	
	Loss on Disposal	5,200	
	Mineral Rights		62,400
	<i>To record disposal of the mineral rights;</i>		
	$\$13,000 + \$15,600 + \$15,600 + 13,000 = \$57,200$		
	<i>accum. amortization.</i>		
31	Accumulated Depreciation, Equipment.....	224,400	
	Loss on Disposal	20,400	
	Equipment		244,800
	<i>To record disposal of the equipment;</i>		
	$\$51,000 + \$61,200 + \$61,200 + \$51,000 = \$224,400$		
	<i>accum. depreciation.</i>		
31	Accumulated Depreciation, Truck.....	87,450	
	Loss on Disposal	7,950	
	Truck		95,400
	<i>To record disposal of the truck;</i>		
	$\$19,875 + \$23,850 + \$23,850 + \$19,875 = \$87,450$		
	<i>accum. depreciation.</i>		

Problem 9-21A (40 minutes)

Year 1

Jan. 1	Trucks	22,000	
	Cash		22,000
	<i>Record cost of truck (\$20,515 + \$1,485).</i>		

Dec. 31	Depreciation Expense—Trucks	4,000	
	Accumulated Depreciation—Trucks		4,000
	<i>Record depreciation [(\$22,000 - \$2,000)/5].</i>		

Year 2

Dec. 31	Depreciation Expense—Trucks	5,200*	
	Accumulated Depreciation—Trucks		5,200
	<i>Record depreciation.</i>		

*Year 2 depreciation	
Total cost	\$ 22,000
Less accumulated depreciation (from Year 1)	<u>4,000</u>
Book value	18,000
Less revised salvage value	<u>2,400</u>
Remaining cost to be depreciated	<u>\$ 15,600</u>
Revised useful life	4 yrs.
Less one year used in Year 1	<u>1 yrs.</u>
Revised remaining useful life	<u>3 yrs.</u>
Total depreciation for Year 2 (\$15,600/3)	<u>\$ 5,200</u>

Year 3

Dec. 31	Depreciation Expense—Trucks	5,200	
	Accumulated Depreciation—Trucks		5,200
	<i>Record annual depreciation.</i>		

Dec. 31	Cash	5,300	
	Accumulated Depreciation—Trucks	14,400**	
	Loss on Disposal of Trucks	2,300***	
	Trucks		22,000
	<i>Record sale of truck.</i>		

**Accumulated depreciation on truck at 12/31/Year 3	
Year 1	\$ 4,000
Year 2	5,200
Year 3	<u>5,200</u>
Total	<u>\$14,400</u>
***Book value of truck at 12/31/Year 3	
Total cost	\$22,000
Less accumulated depreciation	<u>(14,400)</u>
Book value	<u>\$ 7,600</u>
Loss (\$5,300 cash received - \$7,600 book value)	<u>\$ 2,300</u>

***Problem 9-22A (30 minutes)**

Part 1

a.

2023

Jun. 27	Depreciation Expense, Boat – Motor	2,660	
	Accumulated Depreciation, Boat – Motor		2,660
	<i>To update depreciation in 2023 regarding motor being replaced.</i>		

27	Boat – Motor (new)	63,000	
	Accumulated Depreciation, Boat – Motor	43,890 ¹	
	Loss on Disposal	9,310	
	Boat – Motor (old)		53,200
	Cash		63,000
	<i>To record replacement of motor.</i>		

b.

Dec. 31	Depreciation Expense, Boat	3,113 ²	
	Accumulated Depreciation, Boat		3,113
	<i>To record revised depreciation for 2023 on the boat (boat body plus motor).</i>		

Calculations:

1. $53,200 \div 10 \text{ years} = 5,320/\text{year}$; $5,320 \times 9/12 = 3,990$ depreciation for 2015; $5,320 \times 7 \text{ years}$ for 2016 thru 2022 = 37,240; $5,320/\text{year} \times 6/12 = 2,660$ deprec. from Jan. 1/23 to June 27/23; $37,240 + 3,990 + 2,660 = 43,890$ accumulated depreciation at June 27, 2023;

2. Body: Accumulated depreciation at Dec. 31, 2022:
 $23,800 - 7,000 = 16,800$; $16,800 \div 15 \text{ years} = 1,120/\text{year}$; $1,120 \times 9/12 = 840$ depreciation for 2015; $1,120 \times 7 \text{ years}$ (2016 thru 2022) = 7,840; $7,840 + 840 = 8,680$
 Revised depreciation at Dec. 31, 2023 (rounded):
 $23,800 - 8,680 - 7,000 = 8,120$ remaining depreciable cost; $8,120 \div 12.25^1 \text{ years} =$ \$ 663*

¹ $20 - 7 \frac{9}{12} = 12 \frac{3}{12}$ or 12.25 years remaining useful life

Motor: $63,000 - 4,200 = 58,800$; $58,800 \div 12 \text{ years} = 4,900/\text{yr} \times 6/12 =$ 2,450
\$3,113

*rounded to the nearest whole dollar since depreciation is based on estimates.

Part 2

Total 2023 depreciation = \$2,660 + \$3,113 = \$5,773

Problem 9-2B (25 minutes)

Xentel Interactive Balance Sheet September 30			
	2023		2022
Assets			
Current assets:			
Cash	\$ 900		\$ 2,700
Accounts receivable	1,800		4,320
Prepaid insurance	<u>-0-</u>		<u>1,530</u>
Total current assets		\$ 2,700	\$ 8,550
Property, plant and equipment:			
Land		68,400	68,400
Machinery	\$295,200		\$115,200
Less: Accumulated depreciation	<u>90,000</u>	205,200	<u>82,800</u>
Building	\$225,000		\$225,000
Less: Accumulated depreciation	<u>54,000</u>	<u>171,000</u>	<u>50,400</u>
Total property, plant and equipment		444,600	275,400
Intangible assets:			
Copyright	\$ 7,200		\$ 7,200
Less: Accumulated amortization	<u>1,080</u>	<u>6,120</u>	<u>540</u>
Total assets		<u>\$453,420</u>	<u>\$290,610</u>
Liabilities			
Current liabilities:			
Accounts payable	\$ 4,320		\$ 3,150
Unearned fees	<u>82,800</u>		<u>5,580</u>
Total current liabilities		\$ 87,120	\$ 8,730
Non-current liabilities:			
Notes payable, due in 2027		<u>230,220</u>	<u>55,800</u>
Total liabilities		\$317,340	\$ 64,530
Equity			
Mason Xentel, capital		<u>136,080*</u>	<u>226,080</u>
Total liabilities and equity		<u>\$453,420</u>	<u>\$290,610</u>

$$*226,080 - 72,000 + 540,000 - 558,000 = 136,080$$

Analysis component:

Xentel's assets were mainly financed by equity in 2022. In 2023, Xentel's assets were mainly financed by debt. The increase in the debt financing has weakened the balance sheet as opposed to strengthening it.

Problem 9-3B (25 minutes)

Year	(a) Straight-line	(b) Double-declining-balance (Rate = $2/4 = .50$ or 50%)	(c) Units-of-production (Rate = $[(169,200 - 24,000)/181,500] = .80/\text{unit}$)
2021	36,300 ¹	$50\% \times 169,200 = 84,600$	30,640 ($.80 \times 38,300$)
2022	36,300	$50\% \times (169,200 - 84,600) = 42,300$	32,920 ($.80 \times 41,150$)
2023	36,300	\$18,300 ²	42,080 ($.80 \times 52,600$)
2024	36,300	0	39,560 ³

1. $(169,200 - 24,000)/4 = 36,300/\text{year}$

2. Maximum depreciation is limited to \$145,200 which is cost less residual ($\$169,200 - \$24,000$) therefore depreciation for 2023 is \$18,300 calculated as $\$145,200 - \$126,900$ accumulated depreciation recorded to date.

3. Maximum depreciation is limited to \$145,200 which is cost less residual ($\$169,200 - \$24,000$) therefore depreciation for 2024 is \$39,560 calculated as $\$145,200 - \$105,640$ accumulated depreciation recorded to date.

Problem 9-4B (30 minutes)

Part 1. Purchase made on January 1, 2023

A. Double-declining balance method

	2023	2024	2025
Machinery.....	\$588,000	\$588,000	\$588,000
Less: Accumulated depreciation.....	58,800	164,640	249,312
Year-end book value	\$529,200	\$423,360	\$338,688
Depreciation expense for the year ¹	\$58,800	\$105,840	\$84,672

B. Straight-line method

Machinery.....	\$588,000	\$588,000	\$588,000
Less: Accumulated depreciation.....	26,600	79,800	133,000
Year-end book value	\$561,400	\$508,200	\$455,000
Depreciation expense for the year ²	\$26,600	\$53,200	\$53,200

1. Rate = $2/10 = .20$ or 20%2023: $20\% \times 588,000 \times 6/12 = 58,800$ note – using half year rule2024: $20\% \times (588,000 - 58,800) = 105,840$ 2025: $20\% \times (588,000 - 58,800 - 105,840) = 84,672$ 2. $(588,000 - 56,000)/10 = 53,200 \times 6/12 = 26,600$

Problem 9-4B (continued)

Part 2. Purchase made on April 1, 2023	2023	2024	2025
A. Double-declining balance method			
Machinery.....	\$588,000	\$588,000	\$588,000
Less: Accumulated depreciation	<u>58,800</u>	<u>164,640</u>	<u>249,312</u>
Year-end book value	<u>\$529,200</u>	<u>\$423,360</u>	<u>\$338,688</u>
Depreciation expense for the year ¹	<u>\$58,800</u>	<u>\$105,840</u>	<u>\$84,672</u>
B. Straight-line method			
Machinery.....	\$588,000	\$588,000	\$588,000
Less: Accumulated depreciation	<u>26,600</u>	<u>79,800</u>	<u>133,000</u>
Year-end book value	<u>\$561,400</u>	<u>\$508,200</u>	<u>\$455,000</u>
Depreciation expense for the year ²	<u>\$26,600</u>	<u>\$53,200</u>	<u>\$53,200</u>

3. Rate = $2/10 = .20$ or 20%
 2023: $20\% \times 588,000 \times 6/12 = 58,800$ (note – using half year rule)
 2024: $20\% \times (588,000 - 58,800) = 105,840$
 2025: $20\% \times (588,000 - 58,800 - 105,840) = 84,672$

4. $(588,000 - 56,000)/10 = 53,200 \times 6/12 = 26,600$

Problem 9-5B (30 minutes)

Year	Depreciation Method:		
	Straight-line	Double-declining balance	Units-of-production
2023	$(145,000 - 25,000)/5 = 24,000/\text{year} \times 2/12 = 4,000$	Rate = $2/5 = .40$ or 40% $145,000 \times 40\% \times 2/12 = 9,667$	Rate = $(145,000 - 25,000)/100,000 = 1.20/\text{km}$ $1.20 \times 5,800 = 6,960$
2024	24,000	$(145,000 - 9,667) \times 40\% = 54,133$	$1.20 \times 19,400 = 23,280$
2025	24,000	$(145,000 - 9,667 - 54,133) \times 40\% = 32,480$	$1.20 \times 22,850 = 27,420$
2026	24,000	$(145,000 - 9,667 - 54,133 - 32,480) \times 40\% = 19,488$	$1.20 \times 25,700 = 30,840$
2027	24,000	4,232*	$1.20 \times 19,980 = 23,976$
2028	20,000	0	$120,000 - 112,476 = 7,524^{**}$
Totals	120,000	120,000	120,000

*Maximum allowed = \$4,232 [$\$120,000 - (\$9,667 + \$54,133 + \$32,480 + \$19,488)$]

**Maximum allowed = \$7,524 [$\$120,000 - (\$6,960 + \$23,280 + \$27,420 + \$30,840 + \$23,976)$]

Problem 9-6B (30 minutes)

Year	Depreciation Method:		
	Straight-line	Double-declining balance	Units-of-production
2023	$(145,000 - 25,000)/5 = 24,000/\text{year} \times 6/12 = 12,000$	Rate = $2/5 = .40$ or 40% $145,000 \times 40\% \times 6/12 = 29,000$	Same as Problem 9-4B; Units-of-production is usage based and not affected by time 6,960
2024	24,000	$(145,000 - 29,000) \times 40\% = 46,400$	$1.20 \times 19,400 = 23,280$
2025	24,000	$(145,000 - 29,000 - 46,400) \times 40\% = 27,840$	$1.20 \times 22,850 = 27,420$
2026	24,000	$(145,000 - 29,000 - 46,400 - 27,840) \times 40\% = 16,704$	$1.20 \times 25,700 = 30,840$
2027	24,000	56*	$1.20 \times 19,980 = 23,976$
2028	12,000	0	$120,000 - 112,476 = 7,524^{**}$
Totals	120,000	120,000	120,000

* Maximum allowed = \$56 [$\$120,000 - (\$29,000 + \$46,400 + \$27,840 + \$16,704)$]

** Maximum allowed = \$7,524 [$\$120,000 - (\$6,960 + \$23,280 + \$27,420 + \$30,840 + \$23,976)$]

Description	Date of Purchase	Depreciation Method	Cost ¹	Residual	Life	Balance of Accum. Deprec. Apr. 30, 2023	Depreciation Expense for 2024	Balance of Accum. Deprec. Apr. 30, 2024
Equipment	Oct. 3/20	Straight-line	\$ 62,400	\$ 16,800	20 yr.	\$ 5,890 ¹	\$ 2,280 ²	\$ 8,170 ³
Machinery	Oct. 28/20	Units-of-production	540,000	180,000	100,000 units	73,332 ⁴	38,124 ⁵	111,456 ⁶
Tools	Nov. 3/20	Double-declining balance	64,000	15,000	5 yr.	45,568 ⁷	3,432 ⁸	49,000 ⁹

- $(62,400 - 16,800)/20 = 2,280/\text{year} \times 2 \frac{7}{12} = \underline{5,890}$
- $(62,400 - 16,800)/20 = \underline{2,280/\text{year}}$
- $5,890 + 2,280 = \underline{8,170}$
- Rate = $(540,000 - 180,000)/100,000 = 3.60/\text{unit}$;
 2021: $940 \times 3.60 = 3,384$
 2022: $10,150 \times 3.60 = 36,540$
 2023: $9,280 \times 3.60 = \underline{33,408}$
 $\underline{73,332}$
- $10,590 \times 3.60 = \underline{38,124}$
- $73,332 + 38,124 = \underline{111,456}$
- Rate = $2/5 = .40$ or 40%
 2021: $40\% \times 64,000 \times 6/12 = 12,800$
 2022: $40\% \times (64,000 - 12,800) = 20,480$
 2023: $40\% \times (64,000 - 12,800 - 20,480) = \underline{12,288}$
 Accumulated depreciation at Apr. 30, 2023 = $\underline{\$45,568}$
- 2024: $(64,000 - 15,000) - 45,568 = \underline{3,432}$
- $45,568 + 3,432 = \underline{49,000}$

Problem 9-11B (20 minutes)

2023

June 26	Truck.....	71,820	
	Cash.....		71,820
	<i>To record purchase of new truck; \$68,400 + \$3,420 freight costs.</i>

 \end{array}$$

Problem 9-13B (40 minutes)

2023

Jan. 3	Warehouse – Furnace (new).....	39,000	
	Accumulated Depreciation, Warehouse – Furnace	18,153 ¹	
	Loss on Disposal	8,847	
	Warehouse – Furnace (old).....		27,000
	Accounts Payable		39,000

*To record installation of new warehouse furnace.**Calculations:*

- 2018 Deprec.: $27,000 \times 2/10 = 5,400$;
 2019 Deprec.: $(27,000 - 5,400) \times 2/10 = 4,320$;
 2020 Deprec.: $(27,000 - 9,720) \times 2/10 = 3,456$;
 2021 Deprec.: $(27,000 - 13,176) \times 2/10 = 2,765$;
 2022 Deprec.: $(27,000 - 15,941) \times 2/10 = 2,212$;
 Accum. Deprec. Dec. 31, 2022 = $5,400 + 4,320 + 3,456 + 2,765 + 2,212 = 18,153$.

Part 2

Windows	$51,750 \div 15 =$	\$ 3,450
Doors	$105,000 \div 20 = 5,250/\text{yr}$; $5,250/\text{yr} \times 5 \text{ yrs} = 26,250$ Accum. Dep.; $105,000 - 26,250 = 78,750$ book value; $78,750 - 23,100 = 55,650$ revised depreciable value; $55,650 \div (12 \text{ yrs} - 5 \text{ yrs} = 7 \text{ yrs}) =$	7,950
Roofing	$43,500 \div 10 =$	4,350
Siding	$54,000 \div 25 =$	2,160
Framing/Walls	$222,000 - 60,000 = 162,000$; $162,000 \div 30 =$	5,400
Furnace	$39,000 \times 2/16 =$	4,875
Misc.	Maximum allowable depreciation reached ¹	-0-
Total depreciation expense to be recorded on the warehouse for 2023=		<u>\$28,185</u>

- 2018: $61,500 \times 2/5 = 24,600$;
 2019: $(61,500 - 24,600) \times 2/5 = 14,760$;
 2020: $(61,500 - 39,360) \times 2/5 = 8,856$;
 2021: $(61,500 - 48,216) \times 2/5 = 5,314$;
 2022: $(61,500 - 53,530) \times 2/5 = 3,188$ which exceeds max. allowable accumulated depreciation of 54,000 therefore the maximum that can be recorded in 2022 is $54,000 - 53,530 = 470$ with no depreciation recorded in any subsequent years.

Problem 9-14B (40 minutes)

Part 1

2023

Mar. 31	Impairment Loss	26,000	
	Computer Equipment		26,000
	<i>To record impairment loss on computer equipment.</i>		
31	Impairment Loss	23,750	
	Machinery		23,750
	<i>To record impairment loss on machinery.</i>		

*Calculations:

	Book Value	Recoverable Value	Impairment Loss
Computer equipment	\$ 32,250	\$6,250	\$26,000
Land	145,000	172,500	NA
Machinery	88,750	65,000	23,750
Warehouse	173,500	243,750	NA

Problem 9-14B (concluded)

Part 2

La Mancha Enterprises
Balance Sheet
March 31, 2023

Assets

Current assets:

Cash		\$ 35,000	
Accounts receivable	\$ 57,500		
Less: Allowance for doubtful accounts	<u>6,000</u>	51,500	
Office supplies		<u>4,875</u>	
Total current assets			\$ 91,375

Property, plant and equipment:

Land		\$145,000	
Warehouse	\$ 460,000		
Less: Accumulated depreciation	<u>286,500</u>	173,500	
Machinery	\$217,500 ¹		
Less: Accumulated depreciation	<u>152,500</u>	65,000	
Computer equipment	<u>\$46,500²</u>		
Less: Accumulated depreciation	<u>40,250</u>	<u>6,250</u>	
Total property, plant and equipment			<u>389,750</u>
Total assets			<u>\$481,125</u>

Liabilities

Current liabilities:

Accounts payable	\$ 14,750		
Salaries payable	33,750		
Current portion of long-term mortgage	<u>59,550</u>		
Total current liabilities		\$108,050	

Non-current liabilities:

Mortgage payable, less current portion		<u>34,200</u>	
Total liabilities			\$142,250

Equity

Joy La Mancha, capital			<u>338,875³</u>
Total liabilities and equity			<u>\$481,125</u>

Calculations:

- 241,250 cost – 23,750 impairment loss = 217,500
- 72,500 cost – 26,000 impairment loss = 46,500
- 407,875 adjusted capital balance + 1,227,500 revenues – 1,246,750 expenses – 26,000 impairment loss, computer equip. – 23,750 impairment loss, machinery. = 338,875 post-closing capital balance

Analysis component:

The recording of an impairment loss causes expenses to increase which in turn causes net income to decrease. Decreases in income cause equity on the balance sheet to decrease.

Problem 9-15B (45 minutes)

Part 1

2023

Mar.	2	Depreciation Expense, Van.....	1,575	
		Accumulated Depreciation, Van ¹		1,575
		<i>To record depreciation on van for 2023.</i>		
	2	Cash	17,920	
		Accumulated Depreciation, Van ¹	42,175	
		Loss on Disposal.....	4,305	
		Van		64,400
		<i>To record sale of van.</i>		

Part 2

Aug.	27	Depreciation Expense, Machinery.....	12,642	
		Accumulated Depreciation, Machinery ²		12,642
		<i>To record depreciation on machinery for 2023.</i>		
	27	Cash	95,718	
		Accumulated Depreciation, Machinery ²	33,082	
		Machinery		128,800
		<i>To record sale of machinery.</i>		

Part 3

June	29	Depreciation Expense, Equipment	3,500	
		Accumulated Depreciation, Equipment ³		3,500
		<i>To record depreciation on equipment for 2023.</i>		
	29	Cash	27,720	
		Accumulated Depreciation, Equipment ³	48,300	
		Gain on Disposal.....		420
		Equipment.....		75,600
		<i>To record sale of equipment.</i>		

Calculations:

1. Depreciation from Feb. 1/23 to Mar. 2/23:

$$\frac{64,400 - 40,600 - 9,800}{40,000} = \$0.35/\text{km} \times 4,500 \text{ km} = 1,575$$

$$\begin{array}{r} + 40,600 \\ \hline 42,175 \end{array}$$

(calculations continued on next page)

Problem 9-15B (concluded)

2. Depreciation from Feb. 1/23 to Aug. 27/23:

$$128,800 - 20,440 = 108,360 \text{ Book Value}$$

$$\text{Rate} = 2/10 = .20 \text{ or } 20\%$$

$$108,360 \times 20\% \times 7/12 =$$

$$\begin{array}{r} 12,642 \\ + 20,440 \\ \hline 33,082 \end{array}$$

3. Depreciation from Feb. 1/23 to June 29/23:

$$\frac{75,600 - 44,800 - 5,600}{3} \times 5/12 =$$

$$\begin{array}{r} 3,500 \\ + 44,800 \\ \hline 48,300 \end{array}$$

Accumulated Depreciation—
Machinery

Loss on Disposal of Machinery	16,605***	
Machinery		114,270

Record sale of machine.

**Accumulated depreciation on machine at 12/31/Year 3:

Year 1	\$ 17,425
Year 2	27,500
Year 3	<u>27,500</u>
Total.....	<u>\$ 72,425</u>

***Book value of machine at 12/31/Year 3:

Total cost	\$114,270
Less accumulated depreciation	<u>(72,425)</u>
Book value	<u>\$ 41,845</u>
Loss (\$25,240 cash received - \$41,845 book value)	<u>\$ 16,605</u>

***Problem 9-22B (40 minutes)**

1.a.	2023			
	Oct. 3	Depreciation Expense, Equipment – Fan	4,320	
		Accum. Deprec., Equipment – Fan.....		4,320
		To update depreciation on replaced fan from Jan 1/23 to Oct 3/23.		
	3	Cash	8,400	
		Accum. Deprec., Equipment – Fan	29,280 ¹	
		Equipment – Fan (old).....		32,400
		Gain on Disposal.....		5,280
		<i>To record sale of replaced fan on the equipment.</i>		
	3	Equipment – Fan (new).....	36,000	
		Cash		36,000
		<i>To record purchase of replacement fan on equipment.</i>		
1.b.	Dec. 31	Depreciation Expense, Equipment - Fan.....	22,370 ²	
		Accum. Deprec., Equipment - Fan		22,370
		<i>To record depreciation for 2023 on the equipment (sum of all components).</i>		

Calculations:

- $32,400 - 3,600 = 28,800$; $28,800 \div 5 \text{ yrs} = 5,760/\text{yr}$;
 $5,760 \times 4/12 = 1,920$ deprec. for 2018;
 $5,760/\text{yr} \times 4 \text{ yrs (2019 to 2022 inclusive)} = 23,040$;
 $5,760/\text{yr} \times 9/12$ (max depreciation to depreciate 5 years) = 4,320 deprec. from Jan. 1/23 to Oct. 3/23;
 $1,920 + 23,040 + 4,320 = 29,280$ accum. deprec. at Oct. 3/23.

***Problem 9-21B (continued)**

2.	Metal Frame	$144,000 - 36,000 = 108,000$; $108,000 \div 20 \text{ yrs} = 5,400/\text{yr}$; $5,400/\text{yr} \times 4/12 = 1,800$ deprec. for 2018 ; $5,400/\text{yr} \times 4 \text{ yrs (2019 to 2022 inclusive)} = 21,600$; $1,800 + 21,600 = 23,400$ accum. deprec. at Dec. 31/22; Revised deprec. = $144,000 - 23,400$ accum. deprec. = $120,600$ remaining book value; $120,600 - (36,000 - 12,000 = 24,000$ residual value) = $96,600$ remaining depreciable cost; $96,600 \div 20 \text{ yrs} =$	\$4,830
	Engine	2018: $96,000 \times 2/10 \times 4/12 = 6,400$ 2019: $96,000 - 6,400 = 89,600 \times 2/10 = 17,920$ 2020: $89,600 - 17,920 = 71,680 \times 2/10 = 14,336$ 2021: $71,680 - 14,336 = 57,344 \times 2/10 = 11,469$ 2022: $57,344 - 11,469 = 45,875 \times 2/10 = 9,175$ 2023: $45,875 - 9,175 = 36,700 \times 2/10 =$	7,340
	New Fan	$36,000 - 4,800 = 31,200$; $31,200 \div 5 \text{ yrs} = 6,240 \times 3/12 =$	1,560
	Conveyor System	$126,000 - 39,600 = 86,400$; $86,400 \div 10 \text{ yrs} =$	8,640
	Misc. Parts	2018: $27,600 \times 2/5 \times 4/12 = 3,680$ 2019: $27,600 - 3,680 = 23,920 \times 2/5 = 9,568$ 2020: $23,920 - 9,568 = 14,352 \times 2/5 = 5,741$ 2021: $14,352 - 5,741 = 8,611 \times 2/5 = 3,444$ 2022: $8,611 - 3,444 = 5,167 \times 2/5 = 2,067$ which exceeds max.; maximum that can be taken in 2022 is $5,167 - 4,800 =$ 367; therefore, no depreciation is taken in 2023	-0-
			<u>\$22,370</u>

Part 2

Total 2023 depreciation = $\$4,320 + \$22,370 = \underline{\underline{\$26,690}}$

ANALYTICAL AND REVIEW PROBLEMS

A&R Problem 9-1

The following points should be set out in the report:

1. Assets on which depreciation was charged were purchased for use in the business and not for resale. Therefore, the fact that they may be sold for more than cost is not relevant since, in keeping with the cost principle, PPE are maintained in the accounting records at cost.
2. Because these assets are subject to both physical and economic (obsolescence) deterioration, they have a limited useful life span, however long it may be, and their cost, less any residual value, must be allocated over their useful life.
3. Maintenance expenditures maintain these assets in a properly functioning order. They, however, do not eliminate the fact of physical and economic deterioration.
4. Not charging periodic depreciation is in violation of the matching principle and results in an understatement of expenses and overstatement of net income.
5. Depreciation is a process of allocation not of valuation.

ETHICS CHALLENGE

1. When managers acquire new assets a variety of decisions relative to depreciation must be made. The asset must be assigned a useful life and residual value, and a method of depreciation must be chosen.
2. It is true that managers can choose a useful life and residual value based on an estimate. However, the estimated life should be the manager's realistic expectation of how long the asset will actually be used in the operations of the business. The estimated residual value should not be arbitrary; it should reflect expectations of the recoverable value of the asset at the end of its useful life to the business, even if it is zero. The depreciation method should reflect a systematic allocation of the asset's cost based on how the asset is actually consumed by the business.
3. By selecting a useful life that is significantly greater than what is realistic in combination with an unreasonably high residual value, the profit margin will be overstated since depreciation expense will be greatly understated.

FFS 9-2

Part 1

NOTE: Both Spin Master and Recipe use the term 'amortization and depreciation' in the statements referenced in this question. To be consistent with the textbook, the answers use the term 'depreciation'.

a.

The \$53,400 (thousand) represents the book value of the PPE. The December 31, 2020, book value is the \$238,800 (thousand) total cost of the PPE assets less the \$185,400 (thousand) total accumulated depreciation of the PPE. *(Note to instructor: Point out to students that this additional information — cost and accumulated depreciation — is found in Spin Masters Note 13 of the financial statements.)*

- b. The full disclosure principle requires financial statements to report all relevant information about the operations and financial position of the entity. In conformance with the full disclosure principle, information in addition to the \$53,400 (thousand) book value is reported in Note 2(l) (depreciation methods) and Note 13 (cost, accumulated depreciation, and net carrying amount).
- c. The depreciation expense for the year ended December 31, 2020, was \$35,700 (thousand). Although depreciation expense typically appears on the income statement, Spin Master does not detail it there but these amounts do appear on the statement of cash flows and in Notes 7, 13 and 14.

Part 2

- a. Recipe's property, plant and equipment at December 27, 2020 is 25.5% of total assets calculated as $(\$538,276,000 / \$2,109,071,000) \times 100$.
- b. Indigo's property, plant and equipment at March 28, 2020 represent 10.33% of total assets calculated as $(\$91,215,000 / \$882,970,000) \times 100$.
- c. Recipe and Indigo operate in different industries: Recipe is an food service/production while Indigo operates bookstores. As such, Recipe has relatively little inventory in comparison to Indigo. Recipe's inventory at December 27, 2020 is \$44,921 thousand or 2.1% of total assets (calculated as $\$44,921,000 / \$2,109,071,000 \times 100$). Indigo's inventory for 2020 is \$241,821 thousand or 27.4% of total assets (calculated as $\$241,812,000 / \$882,970,000 \times 100$). Indigo needs a large stock of inventory in order to operate. R food service operations require inventory to move quickly through operations as it is perishable. Therefore, it seems logical that the mix of assets would be different for each company.

2. CRITICAL THINKING MINI-CASE

CT 9-1

Note to instructor: Student responses will vary and therefore the answer here is only suggested and not inclusive of all possibilities; it is presented in point form for brevity.

Problem:

- Taking the perspective of both the external and internal auditors, there is a problem with how a number of truck expenditures were recorded to the capital asset account.

Goal:*

- To identify which transactions were recorded incorrectly, correct them, and restate net income on the income statement and restate assets and equity on the balance sheet.
- Another goal, from the perspective of the auditor, would be to bring these issues to the attention of the board of directors for their action because there may be ethical concerns regarding the behaviour of the business manager (bonus is tied to income so he/she may be manipulating the recording of transactions to maximize income).

Principles:

- The matching principle has been violated; it requires costs to be allocated or matched to the period in which it helped generate revenues.
- The prudence principle was also violated; it states that assets and income should never be overstated.
- Another GAAP requires consideration: materiality. If the misstatements are not material in nature (not significant in dollar amount so that the decisions of shareholders would not have been affected), the conclusions are affected. Therefore, we must look at the numbers to determine whether materiality has been violated or not.

CT 9-1 (*continued*)

Facts:

as stated in the mini case

—The insurance was incorrectly debited to the Truck account; it should have been debited to a current asset account: Prepaid Insurance. The result of this error is an overstatement of net income in 2021 of \$7,800 ($36,000/24 \text{ months} = 1,500/\text{month insurance used} \times 10 \text{ months} = 15,000$ for 2021 vs. $36,000/5 \text{ yrs useful life} = 7,200$; $15,000 - 7,200 = 7,800$). 2021 net income is not known but if it is assumed that it approximates 2022 net income as reported (\$78,000), then the \$7,800 overstatement of net income in 2021 is material in nature since it approximates 10%.

—The net income in 2022 would also have been materially overstated; by \$10,800 ($1,500 \text{ insurance expense per month} \times 12 \text{ months used} = 18,000 - \text{depreciation of } 7,200 = 10,800$). Net income in 2023 would have been understated by \$4,200 ($7,200 \text{ depreciation} - 3,000 \text{ insurance used} = 4,200$).

—It is unclear from the information provided how the insurance renewal was treated: as an addition to Truck asset account, or as Prepaid Insurance; this would have affected the impact of the misstatement in 2023.

—It is unclear from the information provided whether revised depreciation was calculated when the motors were debited to the truck account (which is correct assuming that the motors enhanced the trucks which is likely). We will assume that this was treated correctly (A betterment with resulting calculation of revised depreciation) given no information to the contrary. The \$32,000 and \$2,500 costs regarding the tires and brakes were capitalized in error; they should have been expensed when incurred in 2022. Therefore, net income in 2022 is overstated by a potential \$34,500 ($32,000 + 2,500$) — I say potential because it is unclear whether revised depreciation was calculated on the truck; this additional depreciation would affect the amount of any misstatement in 2022 and 2023.

—There is also the issue of when the bonus was recorded; these were recorded in the incorrect accounting periods (recorded when paid as opposed to the period which triggered the cost — violation of matching and realization principles). In addition, because the bonuses were based on overstated net income amounts, the bonuses would have been overstated for 2021 and 2022 and potentially in 2023.

—It appears that the 2022 net income was overstated by almost 50%.

Conclusions/Consequences:

- To do 'nothing' would mean that shareholders/owners are making decisions based on inaccurate information.
- If the manager did, in fact, engage in unethical actions, a longer-term implication from the perspective of the manager is that he/she may lose their job and future employability prospects in addition to damaging the credibility of the company and its share values assuming it is publicly held.
- The board of directors need to be made aware of the errors made in recording repairs and maintenance expenses and betterments so that they can deal appropriately with the manager responsible and negative repercussions with shareholders/owners.

*The goal is highly dependent on perspective.
